FOURTH ANNUAL CATALOGUE

OF THE

CENTRAL
NORMAL COLLEGE

AND

COMMERCIAL INSTITUTE,

DANVILLE,

HENDRICKS COUNTY, INDIANA.

1880-81

INDIANAPOLIS:
CARLON & HOLLENBECK, PRINTERS AND BINDERS.
1880.

EXPENSES.

Tuition, per term of ten weeks, in advance,	\$8 00
Tuition, per Review Term of six weeks, in advance,	5 00
Tuition, in advance, for four terms, ten weeks each,	27 00
Board, in clubs, per week,	\$1 50 to 1 80
Popular price of board per week,	1 50
Board in private families per week,	2 00
Room rent per week in private family NOT TO EXCEED	50

By special contract with the citizens, pleasant rooms, furnished, carpeted and kept in order, are rented at this low price, 50 cents per week, to each pupil, two in a room.

Situated in a fertile farming region, also near the wholesale establishments of Indianapolis, we are enabled to furnish board at the very lowest prices.

Pupils can go to school here, by economizing, as cheaply as they may desire. Many board themselves and thus save a great deal of the expense. Many club together privately, furnish their own provisions and hire a cook, and thus economize.

We have quoted above only those prices at which all can positively be accommodated, concerning which we guarantee satisfaction. Furthermore we may say that no one has been compelled to pay more than our advertised rates. We advertise just what can be done, and fulfill every promise we make.

FACULTY.

FRANK P. ADAMS, Principal,

GREEK, THEORY AND PRACTICE OF TEACHING, ENGLISH LITERATURE, ENGLISH GRAMMAR, AND IN SPECIAL CHARGE OF SCIENTIFIC CLASS.

JOHN A. STEELE,

HIGHER MATHEMATICS, METAPHYSICS, LOGIC, POLITICAL ECONOMY, ALGEBRA, AND IN SPECIAL CHARGE OF CLASSIC CLASS.

MISS A. KATE HURON,

LATIN, ALGEBRA, ARITHMETIC, PHYSIOLOGY, READING, AND IN SPECIAL CHARGE OF TEACHERS' CLASS.

MISS DORA LIEUELLEN,

RHETORIC, HISTORY, GEOGRAPHY, AND IN SPECIAL CHARGE OF GENERAL LITERATURE.

W. T. EDDINGFIELD,

BOOK-KEEPING, COMMERCIAL ARITHMETIC, TELEGRAPHY, AND IN CHARGE OF BUSINESS CLASS.

ALEX. C. HOPKINS,*

VOCAL CULTURE, HARMONY, ELOCUTION, ALGEBRA, AND DIRECTOR OF ORCHESTRA.

G. DALLAS LIND,

NATURAL SCIENCES, AND IN CHARGE OF PREPARATORY MEDICAL DEPARTMENT AND LABORATORY.

JOSEPH TINGLEY,

IN SPECIAL CHARGE OF MANUFACTURING LABORATORY.

MISS MARY J. WILLIS,

DRAWING, PAINTING, AND FRENCH.

G. L. SPILLMAN,

GERMAN.

J. C. BROWN,

PENMANSHIP.

MRS. MARY B. HOPKINS,

INSTRUMENTAL MUSIC—PIANO, ORGAN, GUITAR, ETC.

*Prof. Hopkins' place will be filled the first part of the year by Prof. Horace Tingley. Prof. Tingley will also give lessons on the violin and flute.

GENERAL ITEMS.

1. We have a full Faculty of *Energetic, Efficient* and *NORMALLY TRAINED TEACHERS*.

2. *The Teachers devote all their time to School-work. None are engaged in other Professions or Book-selling.*

3. Pleasant relations exist between students and teachers. That cold formality, so marked in some institutions, is unknown here.

4. We have the hearty support and co-operation of an intelligent community.

5. Wealth does not determine the standing of the pupils in the school or in the town. A pupil's position in the estimation of students, citizens and teachers, is determined by his actual worth.

6. There are no grog-shops in Danville or Hendricks county. The drunken riots, common to some places, are seldom heard of here. This helps make Danville a pleasant locality for a school, away from the sight and sound of drunken debauchery.

7. We have large, well-arranged and comfortably furnished buildings.

8. Classes are kept at proper sizes.

9. The Natural Sciences are taught every term.

10. *Text-books can be Rented* at 10 cents a volume per term.

11. The school is well equipped with apparatus, including a fine Microscope, a magnificent set of Surveying and Engineering Instruments, a full line of Chemical, Philosophical and Anatomical Apparatus, Geological Cabinet, Botanical Charts, Metrical Apparatus, etc.

12. **THERE IS NO EXTRA CHARGE** for Law Lectures, Preparatory Medical Course, Business Course, Drawing, German and Vocal Music.

13. Every Department is alive with *Interest, Enthusiasm, Activity*, and a *Spirit of Investigation*.

14. Our students have been the most successful teachers in the land. From various quarters we hear of their prosperity, as Teachers, Editors, Doctors, Lawyers, Ministers, County Superintendents, Farmers and Business Men. Wherever found they as a rule are attending closely to their business, and making it go. Repeatedly do we hear testimony to the fact that they owe their success in a great measure, to their Normal drive and enthusiasm, the inevitable outgrowth of Normal principles.

15. **THE CENTRAL NORMAL COLLEGE IS THE MOST ECONOMICAL SCHOOL IN THE LAND.** We can prove this to the satisfaction of any unprejudiced mind.

ROLL OF GRADUATES.

GRADUATES OF SCIENTIFIC CLASS, 1877.

Bartlet, A. C.....	Lewisville, Ind.	Prior, Allen.....	Nashport, O.
Beery, A.....	Logan, O.	Robe, Oliver.....	New Corner, Ind.
Coombs, J. V.....	Lebanon, Ind.	Sayler, Marcus.....	Gratis, O.
Halstead, Eva.....	Rensselaer, Ind.	Schurr, John.....	Wurtumburg, Prussia.
Huron, A. Kate.....	Avon, Ind.	Schurr, Mrs. Lizzie.....	Ludlow, Vt.
Post, W. A.....	Ottawa, Ill.	Trotter, Smith.....	Plainfield, Ind.

GRADUATES OF TEACHERS' DEPARTMENT, 1877.

Anderson, W. L.....	Ladoga, Ind.	Selby, J. N.....	Tunnelton, Ind.
Burk, DeLou.....	Ladoga, Ind.	Sherrill, J. E.....	Danville, Ind.

CURRICULUM OF THE CENTRAL NORMAL COLLEGE.

TEACHERS' COURSE.*

	MATHEMATICS.	SCIENCES.	LANGUAGE.	FORENSICS, ETC.	DRILLS
FIRST TERM. 10 Weeks.	Arithmetic.	Geography and Map Drawing.	English Grammar.	Debating and Letter Writing.	Penmanship and Drawing.
SECOND TERM. 10 Weeks.	Arithmetic or Algebra.	History of United States.	English Grammar.	Debating and Parliamentary Law.	Elocution and Vocal Music.
THIRD TERM. 10 Weeks.	Algebra.	Physiology.	Rhetoric.	Debating and Parliamentary Law.	Training in Methods and Practice.
FOURTH TERM. 10 Weeks.	Algebra.	Nat. Philosophy and Botany.	Rhetoric or Geometry.	Parliamentary Law.	Training in Methods and Practice.
FIFTH TERM. 6 Weeks.	Arithmetic.	Geography.	English Grammar.	Training in Methods.	

*See remarks on Teachers' Course.

SPECIAL SCIENCE COURSE.*

	MATHEMATICS AND SCIENCES.	SCIENCES.	LATIN, ETC.	LITERATURE.	COMPOSITION AND HISTORY.	FORENSICS.	DRILLS.
FIRST TERM. 10 Weeks.	Geometry.	Botany and Geology.	Latina Prin- cipia.	American Poets.	History of England and Essays.	Debating and Lectures.	Field Work in Botany and Geology.
SECOND TERM. 10 Weeks.	Trigonometry.	Physiology.	Cesar.	Prosody and English Poets.	History of France and Essays.	Debating and Lectures.	Elocution.
THIRD TERM. 10 Weeks.	Nat. Philosophy with Experiments.	Zoology.	Political Econ- omy.	Shakespeare.	History of Rome and Essays.	Debating and Lectures.	Penmanship and Drawing.
FOURTH TERM. 10 Weeks.	Chemistry with Experiments.	Geology and Botany.	Laboratory Practice.	Milton.	History of Greece and Essays.	Debating and Lectures.	Field Work in Botany and Geology.
FIFTH TERM. 6 Weeks.			Laboratory Practice, Field Work and Reviews.				

* See remarks on this Course. The Special Science Course may be substituted for the regular Scientific Course, at option of pupil.

SCIENTIFIC COURSE.

	MATHEMATICS.	SCIENCES.	LATIN.	LITERATURE.	COMPOSITION AND HISTORY.	FORENSICS.	DRILLS.
FIRST TERM. 10 Weeks.	Geometry.	Botany and Geology.	Latina Principia.	American Poets.	History of England and Essays.	Debating and Lectures.	Field Work in Botany and Geology.
SECOND TERM. 10 Weeks.	Trigonometry.	Physiology.	Cesar.	Prosody and English Poets.	History of France and Essays.	Debating and Lectures.	
THIRD TERM. 10 Weeks.	†Analytical Geometry Differential Calculus	Nat. Philosophy with Experiments.	Cesar.	Shakespeare.	History of Rome and Essays.	Debating and Lectures.	
FOURTH TERM. 10 Weeks.	†Integral Calculus, Astronomy.	Chemistry with Experiments.	Virgil	Milton.	History of Greece and Essays.	Debating and Lectures.	
FIFTH TERM. 6 Weeks.	Astronomy.	Reviews.			Training in Methods.		

†Surveying may be substituted for Calculus by consent of Faculty.

CLASSIC COURSE.

	METAPHYSICS, ETC.	LATIN.	GREEK.	LITERATURE.	HISTORY.	FORENSICS.
FIRST TERM. 10 Weeks.	Mental and Moral Philosophy.	Cicero.	Greek Grammar and Xenophon.	Roman Literature.	Outlines of Ancient History	Debating and Lectures by the Pupil.
SECOND TERM. 10 Weeks.	Logic.	Horace.	Homer.	Grecian Literature.	Outlines of Ancient History.	Debating and Lectures by the Pupil.
THIRD TERM. 10 Weeks.	Political Economy.	Livy.	Sophocles.	Mythology.	Outlines of Medieval History.	Debating and Lectures by the Pupil.
FOURTH TERM. 10 Weeks.	Criticism with Essays.	Tacitus.	Æschylus.	History of Literature.	Outlines of Modern History.	Debating and Lectures by the Pupil.
FIFTH TERM. 6 Weeks.		Reviews of Common Branches.		Training in Methods.		

PREPARATORY MEDICAL COURSE.

FIRST TERM. 10 Weeks.	Anatomy.	Botany and Geology.	Latin.
SECOND TERM. 10 Weeks.	Anatomy and Physiology.	Chemistry with Experiments.	Cesar.
THIRD TERM. 10 Weeks.	Nat. Philosophy with Experiments.	Chemistry with Experiments.	Cesar.
FOURTH TERM. 10 Weeks.	Anatomy and Physiology.	Chemistry with Experiments.	Virgil.
FIFTH TERM. 6 Weeks.	Lectures on Anatomy and Physiology.		

Drills.

BUSINESS COURSE.*

	BOOK-KEEPING.	COMMON BRANCHES.	DRILLS.
FIRST TERM. 10 Weeks.	Single Entry. Double Entry. Partnership. Commission.	Commercial Arithmetic. Rapid Methods.	Penmanship. Drawing. Debating.
SECOND TERM. 10 Weeks.	Double Entry. Business Forms. Compound Com- pany Business. Steamboating. Railroading, etc.	English Gram- mar, with Analysis.	Elocution. Spelling. Debating. Commercial Law.

*The Business Course may be begun at the commencement of any term.

There are classes (beginning and advanced) in all the Common Branches every term; three classes every term in Algebra; two in Rhetoric; two in Vocal Music; two in book-keeping; four or five in Latin; one or two in Greek; classes every term in the Natural Sciences; several sections in Debating. This Curriculum has been tried carefully and found to be the most valuable and practical ever followed.

We call attention to the remarks and explanations on the following pages.

DEPARTMENTS.

Preparatory—embracing thorough work in the Common Branches and such other studies as desired.

Teachers'—Common Branches, Algebra, Rhetoric and a partial course in Natural Sciences.

Scientific—requiring preparation in Common Branches, Algebra and Rhetoric, and embracing one of the best courses of study ever offered to students who desire higher work in life. Time required, one year after preparation.

Special Science—a thorough course in Literature and Science, accompanied by short courses in Latin and Mathematics.

Classical—a continuation of scientific for one year, embracing an excellent course in Greek, Latin, Mental and Moral Science, Political Economy, Logic, etc.

Commercial—requiring two terms of ten weeks each.

Surveying and Engineering—requiring one term, preceded by a fair knowledge of Geometry and Trigonometry.

Musical—Instrumental and Vocal. Unparalleled advantages.

Elocutionary—embracing thorough drills in the science and art of expression.

Penmanship, Drawing, Painting—unusual facilities. Penmanship and Drawing free. Painting extra.

Preparatory Medical—designed to give medical students a good preparation for lectures in a Medical College.

Law—practical lectures to entire school.

Telegraphic and Phonographic—facilities good.

Manufacturing—practical instruction in the art of manufacturing apparatus.

PREPARATORY COURSE.

This course meets the needs of all not prepared for a regular course. There are sustained every term in all the Common Branches, beginning, advanced and review classes. No one need fear that he can not be accommodated. We provide for the needs of all. Many young persons make a mistake by spending too much time in the Common Schools. They would save more than half their time, and would be invigorated with the true Normal spirit by preparing for the work in the Normal.

THE CURRICULUM.

THE TEACHERS' ELEMENTARY COURSE.

This course includes a thorough work in the Common Branches, Algebra, Rhetoric and such of the Natural Sciences and drills as are deemed most useful to the teacher in any grade of the Common Schools.

A thorough training is given in the Philosophy of Methods.

The elements of a true teacher are thoroughly developed.

The necessity of *progress, originality, tact, ingenuity, integrity, and tireless industry* are most thoroughly impressed on the minds of all. The work does not consist in a series of dry lectures by the teacher in charge, but in spirited discussions and searching investigations by the class, together with frequent "experience meetings."

A leading study of this class is the development of mind, an important factor in the work of the teacher.

The Demand for Trained Ability in the School-Room.

There is a growing demand for trained teachers. This country is crowded with incompetent teachers. Their places must be filled with persons who have given themselves a careful, thorough training.

DIPLOMAS will be conferred on those who complete the Teachers' Course satisfactorily.

THE SCIENTIFIC COURSE.

Preparation for this course requires a thorough mastery of the Common Branches, Algebra and Rhetoric. Pupils who have not had the required amount of Algebra and Rhetoric, can, under favorable circumstances, complete the work in these branches in the scientific year. Especially is this the case when a pupil has previously studied some of the regular studies of the course.

WE ARE NOW PREPARED to offer better advantages to those desiring to take the Scientific Course than have ever been given by this or any similar institution. In the first place the facilities for illustration have been increased. Extensive arrangements have been made for pupils to construct apparatus for their own use in after work. The pupil who now takes our Scientific Course will have the opportunity to construct for himself in a steam laboratory, with the aid of a competent teacher, a

full set of chemical and philosophical apparatus. All the cost attached to this will be the value of the material used.

Also, the Faculty in this department was never so strong as at present. Prof. Steele will have charge of the mathematics. He has the secret of leading a class through the intricacies and beauties of higher mathematics without discouraging even the weakest.

G. Dallas Lind, a thorough scientist and thorough Normalite, will have charge of the Natural Sciences. He has great ability in this department.

Miss Kate Huron will continue to have charge of Latin. With her experience in this work, her love of the study, and her aptness to teach the same, no school can offer a greater attraction in Latin.

The Principal has for years had charge of the English literature of the scientific class, and will continue in the same department next year, giving more time than ever to the subject.

The vigor, tersness, originality and excellence of the productions, together with the immense amount of History and Literature learned, are sufficient evidences of the efficiency of the instruction in History and Literature. Those who have taken the Scientific Course are now leaders in the various fields of labor. No young person can afford to go through life without the great advantages growing out of the Scientific Course of instruction in this or a similar institution.

To any person desiring to take the Scientific Course we emphasize the fact that it is a most important year in life and that it should not be taken in a school that has meager facilities and a weak faculty. The fact is that it costs less in the Central Normal a year than at these third rate institutions, though the expense for travel may be more. By all means, for such an important year's work, go to a good school where the faculty is strong and facilities are good. We believe confidently that no school in the land is offering such inducements for a Scientific Course as is the Central Normal.

Our graduates from this department are filling good positions, and are everywhere known as *leaders*, because of their energy, perseverance, enthusiasm and never-ceasing activity.

The Degree of Bachelor of Science is conferred on those who complete this course in a satisfactory manner.

SPECIAL SCIENCE COURSE.

This is, we believe, the most practical short course in Science and Literature ever presented. There is a growing demand for scientific knowledge, and an increasing need of an acquaintance with English Literature and General History. To supply this demand and need we have established the Special Science Course, adding to the work in Sciences and Literature, omitting the Mathematics after Trigonometry and the Latin after Cæsar. Abundant apparatus is supplied for this department and trained ability is employed.

The Degree of Bachelor of Science is conferred on those who complete the course satisfactorily, the same as in the Scientific Course.

THE CLASSICAL COURSE.

The Classical Course receives students who have completed the Scientific Course or its equivalent. One year is then required for its completion. The course embraces Latin, Greek, Mental and Moral Science, Political Economy, Criticism, Forensics, and Essays in Ancient History and Mythology. This is a valuable year's work and fits one for any calling or business in life, and is a valuable preparation for any of the professions.

This Department is intended not only for teachers, but for all who desire a good foundation for any work in life. Those who have hitherto completed the course are, without exception, filling good and paying positions.

We recommend this course heartily on account of the breadth of culture it gives, and the *Normal power of concentration*, the exhaustive investigation, together with the acquisition of a knowledge of those subjects which fit a teacher for any position.

The Degree of A. B. is conferred on those who complete this course.

THE COMMERCIAL COURSE.

Two terms, of ten weeks each, are required to complete the Business Course.

Diplomas will, if desired, be conferred on those who complete the course satisfactorily.

Especially Important. We desire to call especial attention to the fact that the Commercial Department has been lately supplied with the *newest* and *most improved* facilities for acquiring a *Practical Business Education*.

The Department is under the supervision of *W. T. Eddingfield*, a graduate of two Commercial Schools, a thorough, experienced and popular teacher, well fitted by nature and acquirements to make the work interesting and successful.

The second term of the course is given to *actual business* operations, such as buying and selling real estate, steamboating, etc.

A good foundation is laid for success by a thorough drill in *Business Correspondence*.

Every pupil is taught to write a good business letter.

Careful attention is given to the preparation of *neat* and *accurate manuscripts*.

Apparatus (currency, merchandise, banking material, etc.), is furnished by the school, *free of extra charge*, and all have practical drills in the management of business.

Every pupil who devotes two terms to the *Business Course* works in

1. A REAL ESTATE OFFICE, in which he buys and sells, mortgages, closes mortgages, leases, sells leases, makes deeds, examines titles, etc.

2. AN INSURANCE OFFICE—Where he studies the interesting and complicated laws that govern Insurance Business; he also organizes an Insurance Company, insures property, reinsures in other companies, appoints agents, pays losses, declares dividends, and performs all other work done by Insurance Companies.

3. MERCANTILE OFFICE—Here he trades in all kinds of merchandise, takes and gives notes, "breaks up," gets sold out at auction, in fact meets with successes and failures the same as in the actual business of life.

Thus he goes on through the *Commission Office, Compound Company Business, Shipping, Railroading, Steamboating, Hotel-keeping*, etc., to the last establishment in the course, viz.:

THE BANK.—Here he fills every office in a regular bank. He acts successively as *Teller, Clerk, Cashier, Book-keeper*, etc. He deals in all kinds of Bonds, Commercial Paper, Gold Certificates, draws drafts, receives drafts, lends and borrows money, discounts notes, and, in fact, does all kinds of banking business.

Thus we believe we have established, by these new features, a Commercial Institute unsurpassed anywhere.

We have secured positions for a large number of our pupils, and shall continue to do all we can for those who deserve good positions.

EXPENSES OF BUSINESS COURSE.

A life-membership in a Commercial College costs, usually, about \$40.00. The pupil finds use for this from six weeks to three months, after which it avails him nothing.

In the Central Normal the tuition is only \$8.00 for a term of ten weeks. No extra charge is made for the Commercial Course.

Many teachers and others, who do not expect to become Book-keepers, have taken our Commercial Course, to their profit and satisfaction.

We believe the drill given to every member of the department, in writing deeds, leases, contracts, notes, applications and business letters, is worth more than the time and money required for the whole course.

To any one who tries this course faithfully and finds it unsatisfactory, and not what we claim for it, we will cheerfully refund his tuition.

For any information not herein given, write to the Principal. We take pleasure in giving full explanations.

THE PREPARATORY MEDICAL DEPARTMENT.

This Department meets an urgent need. Many persons rush off to Medical Colleges with little knowledge of Anatomy, and less of Chemistry, the allied Sciences, and Latin. A thorough knowledge of these subjects contributes largely to the success of any one who is going to attend a Medical College. The course here is eminently practical, and is sure to prove satisfactory to those who try it.

We furnish a full supply of chemicals and apparatus for *Laboratory Practice*.

The work has given eminent satisfaction, and we feel safe in promising the best results to those who desire to take the course. The teacher in charge has had five years' experience in the practice of medicine and is a thorough scientist.

MUSICAL DEPARTMENT.

I. INSTRUMENTAL.

Lessons are given by experienced teachers on the piano, organ, guitar, and such other instruments as may be desired. Pupils are requested to bring their violins, flutes, cornets, clarionets, base viols, etc., and join the "Normal Orchestra," which plays daily under the direction of an experienced director.

II. VOCAL.

Two classes are taught each term, one in the Elements and one in Advanced Work.

During the past year this department was brought to a high state of proficiency under the direction of Prof. Alex. C. Hopkins, a prince of musicians.

We take great pains to afford superior advantages in every department of Musical Science.

In the Advanced Class, are taught Position, Inhalation, Exhalation, Muscular Action, Enunciation and Delivery of Tone, Purity, Concentration, Tone Color, Timbre, Registers, Resonance, Articulation, Quality, Phrasing, Vocalizing, Trilling Swell Style, Musical Elocution, Harmony, Thorough Bass and Philosophy of Sound.

In the Elementary Class instruction will be given in Musical Notation, Style, Expression, Movement, Adaptation, Tune-construction, Hymnology and the best method of conducting choirs and congregational singing.

Reading music at sight, will receive most careful attention and instruction. Glee, Part songs, Cantatas, Oratorios etc., are prepared during the year in the most careful manner.

The work in Harmony consists in an analysis of the scales, tone relations, formation of consonant chords with their dispersions, relations and inversions, dissonant chords, progressions and suspensions.

Parents can send their sons and daughters here to learn music in any form whatever, as we afford all the advantages peculiar to any Western Music School. Classes may be entered at any time.

DEPARTMENT OF ELOCUTION.

The cultivation of the voice and the science and art of expression have become indispensable to a good education. To meet a growing demand we have organized a Department of Elocution of special value and importance. Last year a great deal of money was expended by the Principal in bringing the department up to a high standard. The results were satisfactory and

gratifying. This year we have still greater inducements to offer in this line. The object is to teach and practice those principles, rules, illustrations and exercises necessary to make good readers, and easy, graceful, and forcible speakers.

The narrative, descriptive, moral, religious, senatorial, dramatic, rhetorical, sensational and amusing styles will receive special attention. Careful drills will be given in exercises in breathing, the use of abdominal muscles, forms of the voice, qualities of the voice, force, stress, pitch, movement, and in the accidents of expression. Exercises will be given by teacher and pupil illustrating these essential elements and accidents, and the pupil will be drilled thoroughly in order that he may be able to teach and practice the same efficiently.

A number of our pupils are now giving readings in various parts of the country, and a still greater number have prepared themselves to do excellent teaching in their own schools. Bring such works on Elocution, Vocal Culture, etc., as you may have. Classes may be entered at any time.

DEPARTMENT OF LITERATURE.

No department in the school receives greater attention than English Literature. It is shameful that so many young persons who have acquired a commendable education in many departments of learning should be totally ignorant of the beauties to be found in the writings of Longfellow, Lowell, Whittier, Whipple, Emerson and other immortal American writers, and Shakspeare, Milton, Tennyson, Chaucer and a host of other English writers. The Central Normal has for four years battled against this ignorance, and has met with great success, we feel, sending forth hundreds of young persons with a taste and love of literature, inevitably to result in the heightening of their happiness, efficiency and usefulness.

The Course in Literature commences in the form of letter-writing and composition in the Teachers' and Preparatory Departments, and extends through every Department of the Institution.

Prof. Steele has charge of the Literature of the Classical Class, the Principal has charge of that of the Scientific Class, and Miss Dora Lieuellen has special charge of the rest of the Institution. She has devoted great care to this work, and has met with wonderful success in inspiring her pupils with a thirst for first-class literature. Lately she has taken a course of instruction in the Boston School of Elocution and Oratory, and is, in consequence, still better prepared to do fine work for her pupils. It is our determination that every pupil shall come under the influence of excellent training in this important study.

SURVEYING AND ENGINEERING.

Ten weeks are required for a completion of this course. A previous knowledge of Geometry and Trigonometry is very much needed. The pupil who is prepared for the course and devotes ten weeks faithfully to Surveying and Engineering, will be prepared for all duties of County Surveyor or Civil Engineer.

We have an excellent set of instruments, so that pupils have ample opportunities for field work. The classes are sectioned, and each section has daily practice. No charge for use of instruments.

NATURAL SCIENCES.

The Natural Sciences are illustrated by the use of abundant apparatus, cabinets, etc. We believe no independent Normal is offering facilities equal to those offered here. Besides the advantages afforded by the illustrative apparatus of the Institution, the pupil has an excellent opportunity to make for himself a complete set of philosophical and chemical apparatus.

See remarks under "Steam Laboratory."

The Natural Sciences are in charge of Prof. G. Dallas Lind, a thorough scientist, and an excellent and tireless teacher. Pupils will get a practical knowledge of Botany, Geology, Physiology, Philosophy and Chemistry. It will not be simply a study of books, but a study of subjects, specimens, apparatus, etc.

MATHEMATICS.

The Higher Mathematics are in charge of Prof. J. A. Steele. He has that peculiar and wonderful power of conducting a class through the intricacies, beauties and perplexities of the Higher Mathematics in such a way that the weakest do not become discouraged and the strongest do not fail to keep up their interest.

Mathematics are the ground work, the sub-stratum of an education. No one can afford to be without a vigorous training in this subject. From the beginning of the Preparatory to the end of the Scientific Course the most careful and thorough work is done. Every class from Arithmetic to Calculus is in charge of a good teacher. No inferior teachers employed in any class. Cheap teaching has been entirely discarded as annoying and very costly.

APPARATUS.

We have a *large* and *valuable* collection of Geological specimens open to free use of pupils.

In our *Laboratory* are sufficient apparatus and material for the performance of thousands of interesting, instructive and beautiful experiments in Philosophy and Chemistry. Herbariums and charts are provided for the study of Botany.

Abundant apparatus is furnished for the study of *Physiology*, including a manikin, models of the various organs, beautiful charts, two skeletons, several skulls, one of which is *disarticulated*, showing in a manner otherwise impossible, the Sphenoid, Ethmoid, Temporal, Palatal, etc.

We have a *large, elegant English Microscope*, magnifying from 2,500 to 160,000 areas; and a magnificent set of *Surveying and Engineering Instruments*.

We have lately added a beautiful and complete set of Metrical Apparatus. Every department is equipped as never before. No expense, labor or pains shall stand in the way of making the Central Normal first-class in its facilities for illustration.

The establishment of the manufacturing laboratory has been a means of supplying the school with many valuable pieces of philosophical apparatus.

LIBRARY.

The school is provided with a large, well selected library, consisting of several new sets of Encyclopedias, various valuable reference books and the works of our standard American and English writers. A convenient room is devoted exclusively to the library, which is in charge of an intelligent and accommodating librarian, and open to the free use of the pupils every day.

Text-Books on all the Common Branches and in any of the higher branches can be rented at 10. cts. each per term. Much of the expense can thus be saved. Pupils should bring their old books with them. They will be useful for reference.

MANUFACTURING DEPARTMENT.

Last year we tried an experiment. It is fully known by all the expense attached to the procuring of apparatus. Many teachers are thus of necessity compelled to worry through their schools with scarcely any means of illustration. To obviate this difficulty and give our pupils decided advantages, we established a manufacturing laboratory, placing at its head Dr. Joseph Tingley, a man of wide reputation as a genius at construction of Scientific Apparatus. Several hundred dollars have been expended in this department, and it is now equipped with a handsome steam engine, a Eureka boiler, two metal and wood lathes, circular saws, emery wheels, boring tools, etc., etc. In this laboratory we have constructed all kinds of apparatus, from a set of cubical blocks to a telescope.

We may mention that here has been constructed, for the use of the Normal, the largest Electrical machine in the State. Apparatus illustrating the various phenomena of Natural Philosophy can be constructed by the pupil, under the guidance of the professor, for the cost of the raw material. For less than \$1.00 Solar Microscopes have been constructed which make a mosquito appear eight or ten feet in length. Our pupils have taken hold of this work with remarkable enthusiasm, and have worked out most gratifying results, so that the Steam Laboratory of the Normal is no longer an experiment but an established institution. Apparatus is also made for sale which costs about one-third the price asked at manufacturing establishments. Concerning this, address

PROF. J. TINGLEY & SON,
Normal Laboratory,
Danville, Ind.

OUTLINE OF WORK.

THE CLASSES WE HAVE EVERY TERM.

Grammar.—There are always two classes in Grammar—one *elementary*, the other *advanced*. The Grammar Class has become so widely and favorably known that there is scarcely a necessity of mentioning the advantages here offered in that line. Particular attention is given to definitions and difficult constructions, and an outline of the subject is also made. The last

four weeks of every term are given to analysis, at the end of which time almost every pupil is able to analyze the most difficult sentences.

Arithmetic.—There are three grades of classes in Arithmetic—*beginning, advanced and review*.

Algebra.—Three grades of classes in Algebra are organized at the beginning of every term. One commences the subject. The second commences at Simple Equations and completes the book to "*Problem of the Lights*." The third grade begins at Quadratics and completes the subject.

Geography.—Two grades of classes are sustained every term in Geography. Map Drawing, Physical and Mathematical Geography receive careful attention.

History.—One class is taught in United States History, and one in General History on the Normal plan.

Reading and Spelling.—Much and careful attention is given every term to Reading and Spelling, especially to such reading as is required in schools, society and the home circle.

An Elocutionary Department is sustained every term with marked results.

Physiology.—Two grades of classes are taught in Physiology and Anatomy—*beginning and advanced*. A full line of apparatus is used daily—skeletons, manikins, models, charts, etc.

Natural Philosophy, Chemistry, Zoology, Geology and Botany.—Classes will be formed at the beginning of the term in each of these sciences, and will have the free use of abundant apparatus.

Latin and Greek.—Four grades of classes are sustained every term in Latin. One class is sustained in Greek.

German.—Beginning and advanced classes are taught every term in German. **NO EXTRA CHARGE.**

Mathematics.—*Geometry, Trigonometry, Surveying and Engineering* receive especial attention. The department of Mathematics is in charge of Prof. Steele, a prince of mathematicians.

The very best instruction will be given in Land Surveying, in all its forms, including Leveling, Grading, Laying out Curves, etc., etc.

A Surveyor's Transit is in use for advanced work in this department. This is a new, perfect and magnificent instrument.

There is provided a Surveyor's Compass for ordinary surveying.

Plane Geometry and Trigonometry are taught every term as introductory to Surveying and Engineering.

Trigonometry will be taught as it is taught nowhere else—practically. The pupils will measure triangles in the field, and apply their methods in the most practical manner. Meridian lines will be established by the classes, the process discussed, and their uses applied.

A Teachers' Training Class will be conducted every term. The drill in this will be worth more than the entire expense of attending the institution.

English Literature receives special attention in a series of daily and weekly readings and essays.

Rhetoric is taught every term in beginning and advanced classes.

Business Department.—All the classes of this department are in operation every term. The *Business Course* can be commenced at the beginning of any term. Material is furnished for ACTUAL BUSINESS.

Vocal Music is taught every term in two classes. No extra charge.

Penmanship and Drawing are taught every term.

Debating.—The entire School is organized every term in Debating Sections. They receive special instruction in the practical workings of societies.

The **Recitations** in all the classes are an **hour** in length.

Classes are organized every term to meet the needs of all. No one need fear that he will not be accommodated.

Pupils select their own studies. Advice is always given cheerfully by the teachers.

THE CENTRAL NORMAL COLLEGE.

Announcement for Fifth Year.

TAKING THE LEAD.

The Central Normal College commences its fifth year under more favorable auspices than any preceding year—with stronger and more vigorous support on the part of a larger number of enthusiastic students, with increased facilities in every department, with fresh and invigorating inspiration from past success, and with a FACULTY NOT SURPASSED, IF EQUALLED, IN THE WEST.

For four years we have been making valuable additions to the Faculty, till now we can announce a corps of teachers of which any institution might justly feel proud.

Prof. J. A. Steele has had thirteen years' experience as teacher and student in the National Normal. He is a strong worker and eminently popular teacher.

Miss Kate Huron has had a wide and successful experience and gives universal satisfaction.

Miss Dora Lieuellen has won a popularity in her special departments of which the institution is very proud. She has been eminently efficient.

W. T. Eddingfield has worked up the Commercial Department till it is equal to any this side of Poughkeepsie.

G. Dallas Lind has devoted years to the Natural Sciences, and is the author of several excellent works. He is not only a thorough scholar, but as a teacher he is a thorough Normalite.

Dr. Joseph Tingley was for over twenty-five years professor of Natural Sciences in Asbury University. He has a national reputation as a scientist, and probably no man in the United States is his equal in inventing and contriving easy means of illustration. He is at the head of our laboratory for the construction of scientific apparatus. We believe no other institution offers advantages approaching the Central Normal in this direction.

Prof. Alex. C. Hopkins is one of the finest teachers in the State. He is a prince of musicians and mathematicians. He has brought the Musical Department to a high state of excellence.

J. C. Brown is one of the finest penmen in the country. He has made the department of penmanship very popular.

Miss Willis has devoted years to Art and gives eminent satisfaction in Drawing.

G. L. Spillmann, a native of Switzerland, has charge of German. He speaks the language fluently and understands it thoroughly.

We desire to emphasize this point, that the strength of a Faculty is not all that is desired. Many institutions have strong Faculties, altogether unapproachable. The relation between students and teachers of the Normal, is that of mutual friendship and good will. This is true without a single exception. The teachers are tireless in their efforts to enhance the interests of the pupils. The poor and the rich, the ignorant and learned, all receive that hearty sympathy and earnest encouragement needed by every student.

MANAGEMENT.

The government is such as to develop the highest manhood and womanhood, with no system of spying, no police force, no monasticism; every pupil is thrown on his own responsibility and made to feel accountable to his own manhood and self-respect for good behavior.

Such has been the general character of the school that the good order has been universally praised by the citizens, and quite gratifying to the Faculty. Whenever a pupil fails to comply with the requirements of good sense and the expectations of orderly society, or whenever a pupil fails to improve his time and develop his powers he is quietly and kindly dismissed from the school. But such is the general spirit of the school, the quickening and beneficial effect of our methods, the general enthusiasm of our work, that all, with scarcely an exception, fall into line and take up with work for the very love of it, finding in their regular work and investigation their highest and truest enjoyment.

GENERAL EXERCISES.

Every day is opened with religious and general exercises. No one is required to attend these exercises, yet such is the interest manifested therein that all the school attend. One feature is music furnished by the Music classes and joined by the entire school. Lately there has been organized "The Normal Orchestra." It is found, on inquiry, that we have in school a number of excellent performers on various instruments. These are brought to General Exercises and contribute largely to the interest of the music. Every General Exercise is made valuable, and seldom lasts over half an hour. It is confidently believed that in our General Exercises, general management of the school, class management, etc., more plans have been invented, more contrivances used, more originality shown, than in any similar institution in the country.

We are determined that the Central Normal shall keep abreast of the times and represent the highest thought and development of the age. Others may be content to *follow* and *imitate* in the great reform, the new education, but we feel confident that we will be pronounced free from such inferior practice by all who have observed the never-ceasing progress and activity, the tireless and unflinching perseverance and energy of the Central Normal. We feel justified in asserting that the Central Normal College is a genuine exponent of the true Normal idea, a leader in progress and advancement. We desire to thank the many friends of the school for their hearty coöperation in making the institution a splendid success. We ask continued coöperation and hearty good will, and trust that we shall ever merit the same.

D. APPLETON & CO., Publishers,
NEW YORK, BOSTON and CHICAGO.

Appleton's School Readers,

—BY—

Wm. T. Harris, LL. D., *Supt. Schools, St. Louis, Mo.*

A. J. Rickoff, A. M., *Supt. of Instruction, Cleveland, O.*

Mark Bailey, A. M., *Instr. in Elocution, Yale College.*

FIVE BOOKS SUPERBLY ILLUSTRATED.

Although these books have been before the public but a short time they have attained an unprecedented success and popularity. During the past year a million copies were introduced into the schools of the country. Among the cities and States now using them are New York, Brooklyn, Newark, Jersey City, Paterson, N. J.; Syracuse, N. Y.; Cleveland, O.; Wheeling, W. Va.; Oakland, Cal.; Davenport, Iowa.; Kansas City, Mo.; Lawrence, Kansas; Logansport, Ind.; Racine, Wis., and the States of Minnesota and South Carolina. The test of class use has everywhere confirmed the favorable opinions that were expressed on their first appearance. A sample set of the five books will be forwarded, post-paid, to teachers and school officers, for examination, with a view to introduction, on receipt of \$1.10.

THE PEN AND PICTURE LANGUAGE SERIES,

By J. H. STICKNEY.

Child's Book of Language. A Graded Series of Lessons and Blanks, in Four Numbers.

I. Stories in Pictures. | II. Studies in Animals. | III. Studies in Plants. | IV. Studies of Words.
Letters and Lessons in Language.

Part I. Invention. | Part II. Conversation. | Part III. Literature.

These charming books for Language and Composition Exercises in primary grades are attracting wide attention. Such aids for young pupils have been greatly needed in our schools, and every child should have them.

The Primary and Model Copy Books, with Sliding Copies.

THE PRIMER SERIES.

SCIENCE HISTORY AND LITERATURE. Twenty-five volumes now published.

QUACKENBOS'S AMERICAN HISTORY, FOR SCHOOLS.

Accompanied with numerous Illustrations and Thirty-six Colored Maps. By G. P. Quackenbos, LL. D.

Harkness's Series of Latin Text Books.

CORNELL'S GEOGRAPHIES.

APPLETON'S ARITHMETICAL SERIES.

FREE HAND AND INVENTIVE DRAWING.

Pieces to Speak, and how to Speak them. Price 10c.

School and College Text-Books

PUBLISHED BY HARPER & BROTHERS,
FRANKLIN SQUARE, NEW YORK.

NEW BOOKS.

Studies in English Literature, by Prof. William Swinton, author of Harper's New Language Series. Examination Price, \$1.32.

Chapters from the Physical History of the Earth, by Arthur Nicols, F. G. S., F. R. G. S. Examination Price, 91c.

The Theory of Thought, a Treatise on Deductive Logic, by Noah K. Davis, of the University of Virginia. Examination Price, \$1.50.

Newcomb's Popular Astronomy, by Simon Newcomb, LL. D., Superintendent American Nautical Almanac. A book for High Schools and Colleges, with 112 Engravings and five Maps of the Stars. Examination Price, \$1.00.

First Lessons in Natural History and Language, for Primary and Grammar Schools. Examination Price, (Teachers' Edition,) 38c.

13 North Meridian Street, Indianapolis, Ind.

Agent for Introduction of Harper's School Books.

THE MOST SUCCESSFUL SCHOOL HISTORY EVER ISSUED.

BARNES' BRIEF U. S. HISTORY

Particular attention is invited to the following special features:

- I.—The division into epochs, pages 14, 15, 16, 19, 45, 101, etc.
- II.—The six double-page maps, pages 18, 44, 100, 150, 214, 282—the first, showing routes of navigators and discoverers, and the sixth, showing acquisition of territory, being especially fine—all drawn by Jacob Wells, the first artist in the country. Six double-page campaign maps, pages 121–161–223, etc.
- III.—The “*Reading References*,” pages 16, 42, 98, 146, 212, 280—to aid the teacher and pupils in looking up special subjects and in suggesting new books for the library.
- IV.—The “*Historical Recreations*” in Appendix—useful for reviews, and for arousing an interest in the class.
- V.—The history is brought down to the Indian Difficulty, 1879, page 298.
- VI.—The story is made as interesting as a novel; scholars will thus form a taste and love for American history.
A dull, dry text-book for scholars will give them a distaste for all such reading. Read for an illustration, pages 20–24, and 223.
- VII.—The notes full of anecdotes and biography. Read notes, pages 36–37, 40, 77, 126, 184 and 282.
- VIII.—Descriptions of battles are vivid. Read battles of the Brandywine, page 119; Camden, 128; Bull Run, 219; Murfreesboro, 229; Chicamauga, 247; Gettysburg, 252.
- IX.—Effects of battles are clearly given. Read second paragraph, page 83, for objects of French and Indian war.
- X.—In the new edition, many important changes have been made, but none that will prevent its use with the old edition.
New cuts, pages viii, 11, 14, 42, 52, 92, 93, 95, 96, 97, 111, 116, 138, 177, 257, 280, 292, 296, 299 and XLIX.
- XI.—The non-sectional character of the book, as shown in the treatment of the question of slavery and the Civil War, pages 197, 198, 296, etc.
- XII.—The non-sectarian treatment of Maryland, pages 72, 73; the difference between Pilgrims and Puritans. Note on page 53, and text, page 56. Note on Quakers, pages 69 and 70.
- XIII.—The date at the top of each page, and the heavy titles at the opening of each paragraph. These are convenient for study and reference.

A. S. BARNES & CO., Publishers,
34 and 36 Madison St., Chicago.

McGUFFEY'S REVISED READERS & SPELLER

**THE LATEST, THE MOST ATTRACTIVE, THE
BEST AND THE CHEAPEST.**

1. McGUFFEY'S REVISED READERS cover a wider range of the best English literature than any other series. They contain selections from more than two hundred standard authors.
2. They are better and more profusely illustrated than any other series. More than two hundred and fifty engravings, all new, were prepared expressly for these books by sixty of the best designers and engravers in America.
3. They are more carefully graded than any other series.
4. They are adapted to modern methods of teaching.
5. The typography, printing and binding are in the chastest, most tasteful and most durable style.

McGUFFEY'S REVISED READERS were first issued less than one year ago. Within this short period they have been adopted and introduced by the Boards of Education of the following important cities and towns—a substantial and significant recognition of their superior and intrinsic merits:

New York City,	Brooklyn, N. Y.,	Cincinnati,
San Francisco,	Sacramento,	Los Angeles, Cal.,
Topeka, Kansas,	Burlington, Iowa,	Terre Haute, Ind.,
Fort Wayne, Ind.,	Joliet, Ill.,	Columbus, Ohio,
Dayton, O.,	Chillicothe, Ohio,	Zanesville, Ohio,
New Bedford, Mass.,	Portsmouth, Ohio,	Sandusky, Ohio,
Paris, Ky.,	Connersville, Ind.	Charleston, Ill.,
Chattanooga, Tenn.,	Shelbyville, Tenn.,	Carbondale, Ill.,

And Three Hundred Others.

Also adopted for five hundred Counties and Townships in Ohio, Indiana, Illinois, Kentucky, Tennessee, Missouri, Iowa, Kansas, Georgia, &c.

PRICE.

McGUFFEY'S REVISED READERS and SPELLER will be furnished for first introduction at the following Introduction and Exchange prices:

	Exchange Price.	Sample Copy and Introduction Price.
McGuffey's Revised First Reader.....	.10	.12
McGuffey's Revised Second Reader.....	.15	.20
McGuffey's Revised Third Reader.....	.20	.30
McGuffey's Revised Fourth Reader.....	.25	.35
McGuffey's Revised Fifth Reader.....	.40	.55
McGuffey's Revised Sixth Reader.....	.50	.70
McGuffey's Revised Spelling Book.....	.10	.15

Single Sample Copy for examination, with a view to first introduction, sent post paid, by mail, on receipt of the “Introduction” price, second column.

VAN ANTWERP, BRAGG & CO., Publishers,
Cincinnati and New York.

THE "NORMAL TEACHER" PUBLISHING HOUSE. PRACTICAL PUBLICATIONS.

THE NORMAL TEACHER.

THE MOST WIDELY CIRCULATED SCHOOL JOURNAL IN AMERICA.

In subscribing for a school journal please remember that The Normal Teacher
1. Has the largest circulation of any school journal in the land, which is sufficient evidence that it is considered by teachers to be the best school journal.
2. It is by far the cheapest journal.
3. It is decidedly the most practical.

Single Subscriptions, \$1 00; in clubs of five and over, 75 cents.

THE NORMAL QUESTION BOOK.

A work prepared expressly for the use of teachers in preparing for examinations. Contains nearly four thousand questions and answers on the common school branches, with an Appendix containing outlines of Infinitives, Participles and Analysis in Grammar, Percentage in Arithmetic, Theory and Practice of Teaching, Map Drawing, A Scale of Criticism, Programme of Studies and Recitations, Rules to be observed during Examination, and hints and suggestions on the preparation of MSS., Topic List for the Study of Geography, &c. By far the most valuable work of the kind ever issued from the press. **Price, \$1.50.**

METHODS OF TEACHING IN COUNTRY SCHOOLS.

By G. DALLAS LIND. The only work ever published that meets the wants of country teachers. *Intensely Interesting, Thoroughly Practical, Eminently Adapted to the Country School.*

Read this book before commencing your school. It will give you new insight into your school. Price, \$1.25.

QUEER QUERIES.

A Book for the Student. *A Book for the Teacher.* *A Book for Everybody.*
A collection of questions on different branches of study. Creates great interest in schools, at Institutes, wherever used. Price, 25 cents.

NORMAL OUTLINES OF THE COMMON SCHOOL BRANCHES.

By G. DALLAS LIND, author of *Methods of Teaching in Country Schools*. Price, \$1.00.
This book does not propose to do the work of the pupil by giving such complete outlines as he should be taught to make out himself, but presents a series of partial outlines forming a topic list or skeleton of a lesson for each day of a term, so constructed and accompanied by such hints that the pupil by means of them can construct a logical and expansive outline of the entire ground passed over.

Something New. Grammar made Attractive and Interesting Wake up your dull Grammar class by using

THE "NORMAL TEACHER" PARSING BOOK.

Retail price, 20 cts. per copy. Samples to teachers for examination, 15 cts. Introductory rates by the quantity: 6 copies for \$1.00; 12 copies, \$1.75; 14 copies, \$2.00; 20 copies, \$2.25; 25 copies, \$2.50.

EASY EXPERIMENTS IN CHEMISTRY AND PHILOSOPHY.

By G. Dallas Lind, author of "Methods of Teaching in Country Schools," and "Normal Outlines of the Common School Branches."

This book is the result of many years of study and experiment in the laboratory with the end in view of providing cheap modes of illustrating the more important principles of the Sciences of Chemistry and Natural Philosophy. The manuscript has been put to a practical test by classes in the Central Normal College the students manufacturing the apparatus and performing the experiments according to the instructions here given. Having stood the test of actual use in the class-room, it is evident that no higher praise is needed. Paper, 40 cents; cloth, 60 cents.

THE "NORMAL TEACHER" BLANK SPELLER.

By G. Dallas Lind. In addition to the ordinary ruled blank book for writing spelling lessons, it contains the following valuable matter:

1. Diacritical marks, their names and explanation of their uses.
2. The principal available rules for spelling, pronunciation, use of capitals and punctuation.

3. Hints in teaching spelling.

4. Model spelling lessons and directions for using the book.

5. An outline of orthography and orthoepy, valuable for study and reference.

Price, 20 cents. Sample for examination with view to introduction into schools, 15 cts.

Agents wanted for these and other valuable publications. Correspondence solicited.

SUMMER INSTITUTE

OF

CENTRAL NORMAL COLLEGE, 1881.

SPECIAL ANNOUNCEMENT.

The Review Term of 1881 will be six weeks in length, beginning June 7, 1881. This will enable us to do far greater work than in the four weeks' term hitherto held.

We shall give special attention to

ALL THE COMMON BRANCHES,

Theory and Practice of Teaching, Diacritical Spelling, Metrical System and Natural Sciences.

Classes will also be sustained in other Branches, Algebra, Latin, Rhetoric, etc.

The Manufacturing Department will also be kept running—an important feature to a progressive teacher.

It will pay any teacher to attend this term. It will be conducted by the regular teachers of the school, teachers who are giving their lives to the profession.

For any information concerning the work, address the Principal.

❖ CALENDAR ❖

The Terms are 10 weeks in length.
The Institute Term (or Review Term) continues 6 weeks.
The Fall Term will begin Tuesday, August 31, 1880.
The Winter Term will begin Tuesday, November 9, 1880.
The Spring Term will begin Tuesday, January 18, 1881.
The Summer Term will begin Tuesday, March 29, 1881.
The Institute or Review Term will begin Tuesday, June 7, 1881.
The Fifth Annual Commencement will occur Thursday and Friday, July 14th and 15th, 1881.

❖ LOCATION ❖

Danville, the county seat of Hendricks county, is located on the Indianapolis & St. Louis Railroad, twenty miles west of Indianapolis, and about twenty miles north-east of Greencastle. It is a beautiful and quiet town, containing about two thousand inhabitants, and noted for the intelligence, morality and temperance of its people. There are six churches and five Sunday-schools, to which the pupils are made heartily welcome, the Normal being strictly *non-sectarian*.

If you are not interested in this Catalogue, please hand it to some one likely to attend school. If you desire to attend a vigorous, progressive, first-class, yet economical school, you will do well to investigate our advantages carefully. No school in the land has gained ground so rapidly in the last few years as the Central Normal College. We intend that no school shall give better advantages or do more for its pupils than this. We expect former vigor, drive, vim, snap, enthusiasm and enterprise to continue to characterize the work of the institution.

Do not allow a slight traveling expense to keep you at a home school, deprived of our superior advantages. Consider this point well. Time is money. In a good school, with a good faculty and first-class students, is the place to save time.

For any information write to the Principal. We take pleasure in giving full information. Address

F. P. ADAMS, Principal,
DANVILLE, IND.
