5. Special High School Music Course 5.00  
(Graduation fees must be paid before the date of graduation).

### Transcript Fees

1. 1900 to 1914 .....\$ 2.00
2. One term since 1914 ..... .50
3. Two or more terms since 1914 .... 1.00
4. Transcript of Credentials on file from other schools ..... 1.00
5. For investigation and certificate of attendance previous to 1900 (no records were kept before 1900) .. 2.00

### Practice Teaching Fees

Students taking Practice Teaching are required to pay a fee of \$20.00 which is in addition to all other fees and charges. This covers the complete requirements for practice teaching. The amount is due and payable at the beginning of the term in which the work is taken.

### ACCREDITMENT

The training of teachers and the issuing of teachers' licenses in the State is under the direction of the State Board of Education and the State Superintendent of Public Instruction. Central Normal College is authorized each year by the State Department to continue the training of teachers. This authorization has been made for the year 1937-38, for the training of Primary, Elementary and High School Teachers, including the first year of the new four-year Elementary Education Curriculum.

## Schedule of Classes for 1937-38

The first column in the schedules that follow gives the course numbers of the subjects, the second column gives the descriptive titles, and the third column gives the hours of recitation.

Special Methods courses, both for elementary and high school subjects are listed in the Department of Education.

Anatomy and Physiology apply both in the Science and Physical Education groups.

Classes that become too large will be further sectioned and if sufficient demand appears classes will be organized in additional subjects.

## THE TWO YEAR ELEMENTARY COURSE

After July 1, 1940, beginning elementary teachers must have not less than four years of training above the high school instead of two years as required by the present regulation. Therefore, the school year of 1937-38 offers the last opportunity for students to begin a two year course and finish within the time limit. On this account it is expected that an unusually large number of students will register for the two year course this fall. Central Normal is preparing to care for such students in the best possible way.

Elsewhere in this issue will be found the list of classes to be offered for both elementary and high school teachers. Two-year elementary students will take the subjects in regular sequence as set forth in the course of study. There are no electives in the two-year elementary course.

Appropriate classes are also provided for those who wish to begin the new four year elementary course.

# WINNERS IN THE INTERNATIONAL CONTEST

Left to Right: Mary Evelyn Nay, Marguerite Fraser, Sylvanus Comer, Audrey Roberts and Virginia Huxford. Merrill Miller is not in the group.

Eight places were awarded to students of Central Normal College at the International Commercial Schools Contest at Chicago on June 24 and 25.

Several world's records were broken in the various events. Albert Tangora broke the record for professional typists by typing one hundred forty-one words per minute for one hour.

The amateur test record for one-half hour typing was broken with a speed of one hundred fourteen words per minute. The speed last year was one hundred two. A Washington University student broke a record on the dictating machine with a speed of eighty-seven words per minute.

In the typing contest there were three

classes, novice, amateur and open. The third place in the open class for typewriting was awarded to Mr. Comer. Audra Roberts won third place in novice class.

Sylvanus Comer won first; Virginia Huxford, second, and Marguerite Fraser, third places in the open test in shorthand transcription.

Miss Fraser won first and Merrill Miller won second place in the bookkeeping event, University division.

Miss Roberts also won third place in novice dictating machine contest.

In the high school division of shorthand transcription Peggy McCoun of Danville High School won first place.

# LIST OF SCHOLARSHIP WINNERS

Top Row, Left to Right: Thomas Eggers, Marie Williams, Mary Frances Curry, Mary Elizabeth Alexander, Lucille Hendricksson. Bottom Row, Left to Right: Margaret Martin, Eunice Beard, Jeanette Reffett, Arline Wolfe, Mary Lou Smith.

The cut above includes ten of those awarded scholarships. We are sorry it was not possible to present the pictures of all the winners.

Never before have so many young people been interested in scholarships which are issued to students of ability. These scholarships are divided into several classes. The student making the highest high school record in the county during the four year high school course is awarded a scholarship for four hundred dollars. Twenty-one such students will attend Central Normal College this fall. Those students who make high ratings in a standard scholarship test may receive one hundred dollars, and those of lower rank, fifty dollars. Students who made high ratings while in high school may submit their transcripts for a fifty dollar scholarship. Certain students who are able to contribute to music organizations are also given scholarships.

Central Normal College is awarding ninety-six scholarships of all grades to students who will enter college this fall. A complete list of students who have been favored thus far by scholarships follows: Samuel M. Eggers, Roachdale, Putnam. Eunice Beard, Greensburg, Decatur.

#### CHANGES IN FEES AND EXPENSES

There have been a few changes in fees and expenses which will be effective at the opening of the fall quarter. These have been included in the list published in the issue of this quarterly.

The medical fee has been increased from fifty cents to one dollar per term and it must be paid at the time of registration. This will make the initial fee for enrollment eight dollars, whereas it was formerly \$7.50.

It has become necessary to charge tuition for all work on which credit is given. Faculty members of unprepared and drill subjects must meet the same high standards as those for prepared courses. This makes necessary the same tuition charge. This change affects typing, penmanship, spelling and gymnasium work.

Students may carry sixteen hours of work for a tuition cost of \$42.00. Eighteen hours will cost \$47.00.

Dr. and Mrs. Elisha Arnold, Decatur, Ill., called at the college office May 31. Dr. Arnold graduated in the class of 1900. This is his first visit in the thirty-seven years. We hope he will not wait that long to come again. (Dr. Arnold is a dentist).

### HONORARY DEGREES CONFERRED

In the seventy years in which Central Normal College has been offering courses to young people of the state and nation, many worthy and prominent alumni have gone out from this college. These men and women have held important positions of trust and service, ranging from teachers, educators and lawyers to governors and United States senators. Physicians of world-wide renown and judges of the Supreme bench are among the graduates of this school.

Central Normal College does not intend to enter upon a policy of bestowing degrees far and wide, but there are instances when discriminating recognition may well be made.

This year it seemed very fitting to begin this practice by bestowing a degree upon the Governor of the State. M. Clifford

GOV. M. CLIFFORD TOWNSEND

Townsend has done splendid service in the States as a teacher. He had been chosen by the citizens as their leader. Surely he was deserving of any honor Central Normal College could confer. At the commencement the degree of Doctor of Laws was conferred upon him by President Carl H. Griffey.

No other alumnus of the College is more favorably regarded or more widely known than H. M. Whisler, who received his early training in the school and who for more than twenty years was a member of the faculty. After completing a term in the State Department and serving for a number of years on the faculty of Butler University, he has returned to Central Normal as Dean of the College. In addition to the splendid training which Dean H. M. Whisler has had for this position, he also has the confidence of the great body of alumni who have known him so favorably and so well. No more fitting person could have been chosen to be the first of the alumni of the College to receive an honorary degree. President Carl H. Griffey conferred the degree of Doctor of Pedagogy upon Dean Whisler as a part of the Commencement activities.

## Departmental News

### THE ART DEPARTMENT

Elementary and Art teachers may obtain Art courses that are practical and appropriate to their needs.

A pleasant, newly equipped room is to be provided on the first floor of Science Hall and new equipment and tools will be purchased as the need arises until our department will be the equal of that in any teachers' college.

Students are urged to take their Art courses during the regular school year as they are offered each quarter to obtain a logical, well-graded course. School administrators everywhere have awakened to the importance of teachers knowing the fundamental principles of Art whether they are to teach Art or not.

Those working on Art teachers' courses for license should see Miss Foulds before registering. You must know your requirements and electives. Now 16 hours of Art are required for each elementary teacher and 36 hours for each Art teacher plus the Art methods' course, Education 317A.

### THE ENGLISH DEPARTMENT

When Central Normal College opens in September, a most excellent group of English courses will be available to the students. For the past fifteen terms, Dr. Canary, who is now retiring as head of the department, and those associated with him have worked untiringly to reorganize and adjust our work in English that it may be thoroughly up-to-date and in harmony with the best current practice. The results are highly satisfactory. Central Normal College now has a department of English which offers an English curriculum that is the peer of any that may be had at any college of equal rank.

The new head of the Department of English, Dr. Robert Turner, has his Ph. D. from Yale University, majoring in English.

Miss Bertha Watts, whose competence is well known to thousands of former C. N. C. students, will be back with us after further graduate study at Indiana University.

### COMMERCE COURSES FOR FALL

Both beginning and advanced courses will be given during the Fall Term. Courses in beginning shorthand, beginning typewriting, elementary accounting, commercial law, advanced shorthand, advanced typewriting and advanced accounting will be given during the Fall Quarter. Those students who have had commerce work in high school will be rated according to the amount of work which they have had and placed in corresponding classes.

The course in beginning shorthand continues throughout the year and students who take these courses should be able to take dictation at the end of the year at least at the rate of 80 words a minute. Students in the advanced classes make a review of shorthand principles and take more rapid dictation. During 1936 and 1937 two students of these classes were able to take dictation at 140 words per minute and many others were nearing that goal. The advanced courses should fit the student for court reporting, private secretary work, and newspaper reporting.

Elementary accounting is also taught from the personal as well as vocational point of view. Students who complete the elementary courses are able to manage their personal affairs better and also to keep the ordinary set of business books. The advanced courses review the fundamental principles and then attempt to develop the student so that he is able to comprehend the most advanced sets of books. This course leads into the field of auditing, special accounting work, and toward a C. P. A. degree.

### NMPA CHANGES FORM OF EXCHANGE

The National Mimeograph Paper Association is making plans for extensive changes in the monthly publications which will begin during the fall quarter. The first issue will be sent out by September 20. The exchange this fall will be of two parts—the constructive articles will be published in magazine form on 9x12 paper and the criticisms will be published in newspaper form. These publications will be sent out to all the mimeograph papers listed in the

mailing list which is compiled from some 1,000 papers located all over the United States.

The National Mimeograph Paper Association was formed in 1934 and has for its purposes the fostering of duplicated school papers in order to help them attain higher quality; to give encouragement to amateur journalists and commerce students, and to bind those who are interested more closely together so that a more common understanding and knowledge of what each is doing may result. In this association each member sends in a copy of each issue of its paper which is criticized and commented upon in the monthly Exchange which is sent out to all members. Extra helps are also published for members. In 1936, a booklet on "Duplicated School Papers" was published and given to the members. An Idea Book was assembled during the spring of 1937. An art service is being secured which will give illustrations for current use. This will be sent out monthly with each Exchange.

### DEPARTMENT OF SCIENCE

This age has been termed a "scientific age." The layman is faced each day with many electrical and mechanical devices, the action of which he does not understand. The housewife is faced with the problems of preparing proper food for her family, of cleaning clothing, etc. No one can deny that these individuals will be better able to meet these problems if they have studied physical and biological science. The future of the human race rests on our ability to solve the problems of social disease and racial deterioration.

One of the aims of education is to prepare the individual for worthy home membership and to equip him to fill his place in society. Schools are attempting to supply this need. Increasing demands are being made for teachers of science. No teacher in any field can claim to be adequately prepared without having some training in science.

Central Normal College is prepared to train teachers in both biological and physical science. Laboratories are provided for these courses and new equipment is added each year. A new sound motion picture machine will be available for use in these courses this year.

Students planning to teach should consider science before choosing their majors. Our Placement Bureau was unable to meet the demands for science teachers this year

because so few elect science as their major. A teacher of science who later decides to change his profession will find that his science training will apply on the required training for medicine, engineering, agriculture, nursing and many other professions. Science should be studied for its cultural value in that it gives the individual a deeper appreciation of the physical and biological worlds. We anticipate a rapid growth in the Department of Science.

### NMPA CONFERENCE AND KAPPA PI BETA CONVENTION

The National Mimeograph Paper Association and Kappa Pi Beta will hold their annual convention and conference on the weekend of November 5 and 6 at Central Normal College. The convention of Kappa Pi Beta will begin with the banquet which will be held on Friday evening, Nov. 5. The initiation service will be held and plans made for the coming year as well as for the Saturday's conference.

The National Mimeograph Paper Association conference will be held on Saturday. At this time speakers will be brought to the conference who will give suggestions concerning the mimeographed school paper. Discussions will be held on journalism, mimeograph work, art work, headline writing, organization duties, and all the other phases of mimeograph work. Students from any high school who are interested in mimeograph paper work are cordially invited to attend this conference. The conference of 1936 was attended by students of high schools of Ohio, Indiana, Kentucky, Illinois and Michigan.

### ALUMNI FILE BEING COMPILED

All during last year, Miss Eugenia Johnson worked on the file of the Alumni of Central Normal College. An attempt was made to secure the up-to-date addresses of as many graduates as was possible. The names of the graduates of the classes which were graduated between 1927 and 1936 were assembled in card files. Each graduate of Central Normal College can help with this work by writing frequently to some member of the faculty. This information will be kept for all classes.

When writing, alumni should be sure to give their present address, and what they are doing.
