A COLLEGE COURSE THAT APPEALS TO HIGH SCHOOL GRADUATES

A Four Year's Course with Degree of A. B., in Three Calendar Years
Expenses Low. Efficiency High. Gymnasium, Athletic Field and Coach.

The first class from this new course was graduated in 1914. One member has applied to the State University, and has been given full graduate standing. He will enter at once upon his Master's Degree work. We mention this, in our first paragraph, to show that the course is the full equal of A. B. courses in the other colleges of the country. We, therefore, do not hesitate to ask the patronage of high school graduates. We do ask you to investigate the advantages offered by the C. N. C. We will try to explain clearly.

THE COURSE OF STUDY:

The course itself does not differ much from that of other colleges. It includes those subjects that experience has shown are most desirable, both for value in mental training, and general culture. The course is on the credit plan, and is the same as required by the Indiana State Board of Education in "Standard" colleges. It is open to High School graduates and other of equal qualification. Advanced standing is given when deserved. There is the usual opportunity for electives. See the Annual catalogue for the subjects included. A copy will be mailed on request.

THE INSTRUCTORS:

The instructors have been selected, both on account of thorough preparation in the subjects to be taught, and for exceptional ability in the class room. They are thoroughly in sympathy with the work we do, and intensely interested in the welfare of every student. They received their education in Indiana University, Chicago University, Harvard University, Purdue University, Indiana State Normal School, and Central Normal College.

THE EQUIPMENT:

The various departments have equipment for the work being presented. All apparatus has been selected for utility, rather than show. In Physics and Chemistry the laboratories represent an investment of \$3,000. The new building gives to these two subjects one entire floor, consisting of ten rooms. We can not see how better accommodations could be provided.

THE LIBRARY:

In addition to the excellent selection of reference books in our college collection, our students have free access to the Danville Carnegie Library, one of the best in the state, and the attention of a competent librarian. We can also draw upon the Indiana State Library, without expense to the student. Books are sent to us whenever asked for. No library fee is charged. There is no need to pass the C. N. C. by on account of library facilities.

SOCIETIES:

Greek letter fraternities are unknown. There are numerous literary societies, that do not wholly neglect the social side of life. One can have excellent opportunities to engage in debating. There is an intercollegiate debating society, and any student may engage in the try-outs for a place on the team.

ATHLETICS:

No Indiana college has a better athletic field. The base ball ground is superb. There is a one-fourth mile running track, and a regulation straight-a-way. The entrance to the field is within two blocks of the college. The new gymnasium gives us a most excellent basket ball room.

THE REPUTATION OF THE C. N. C.:

No school of the state is better known as a training school, nor for the B. S. course that was dropped only last year. Nearly one thousand

Illinois Teachers And Prospective Teachers

Please read the article in another column on "Training Illinois Teachers."

persons have completed the old B. S. course. Not less than 2,000 have been graduated from the Business Department. Under the new Indiana laws, three hundred to five hundred high school graduates have been prepared for teaching, each year. Not less than 30,000 students have attended the college, representing every county of Indiana, and probably every state of the Union. Numerous foreign countries have sent students.

Thousands of C. N. C. men and women are holding prominent positions. At the present time Governor Ralston and eleven other state officials of Indiana are C. N. C. men. Six of them, including the Governor, did not attend any other college after graduating here. Nearly one-third of the present county superintendents of Indiana have attended.

It is believed that no other institution has, at any one time, furnished to the state so many eminent officials. While this may never again occur, it is worthy all the prominence we give it.

THE ORGANIZATION:

There is no other Normal College in Indiana organized like the Central Normal College. It is incorporated under a recent Indiana law, without capital stock. It belongs to no one, but by law is controlled by a self-perpetuating Board of Trustees. It can not be sold, or moved. Every cent paid to it must be expended to defray expenses or to make improvements. It is a permanent institution, with an enviable reputation, and worthy the support of any young person. As Governor Ralston said: "There is not another College in the State, I challenge them all, that has produced a greater number of men who have gone out in the world and made their mark."

ATTEND A SMALL COLLEGE:

Eminent educators and successful men in all lines of human endeavor, never tire of talking of the advantages of the small college. Mr. Carnegie has always favored the small schools of the country. David Starr Jordan ridicules the idea of endeavoring to train young men in droves. He speaks of Freshmen by the "yard full." The C. N. C. is a large training school, during the spring and summer, but as a college it is in the "small" class, where opportunities for the individual predominate. From such schools come the great majority of the leaders among men. A student should feel the direct influence of the instructor, and this requires direct contact, something almost unknown in a large institution.

CREDITS TRANSFERRED:

Several thousands of good people count it an honor to be a member of the alumni of the C. N. C., but to those who feel that they must graduate from a large university, we can promise that time can be gained, and money saved, by attending here one or two years. Full credit can be received in any other institution for all the work done in Danville. Your credits can be transferred at any time.

IN CONCLUSION:

Attend the C. N. C. because it offers a practical, sensible course of study; because it is a place for hard work and rapid progress; because credits made here will be accepted anywhere; because the alumni are a power in the world; because the library facilities and the equipment are ample; because Danville is the ideal college town with almost nothing to attract a student away from his work; because every student has a good home with a citizen; because students become well acquainted with their instructors, which is of far greater importance than most young people realize; because Danville is supplied with health giving water from flowing artesian wells; because the "spirit" of this school is the envy of every other, there being no class animosities, and no fraternity cliques.

School Of Music

THE C. N. C. Department of Music presents complete courses, leading to graduation, but Accepts Students of All Grades. Competent, Professional Musicians, only, are employed as instructors.

Courses on Piano, Organ, Violin, Cornet and all other instruments. Course in Voice and one in Training of Teachers of Music for the Public Schools. Band and orchestra practice.

Expenses about one-half those of most schools of music. Send for catalogue.

A Business Education

The Business Course in Central Normal College prepares for any kind of business positions. The course includes Bookkeeping, Shorthand or Stenotypy, and Typewriting. There is ample practice in all three.

There are 3,000 graduates. We have calls for more teachers of commercial subjects than we can supply.

Expenses are a minimum.

A Law School Of Merit

The C. N. C. Course of Law is practical. It is different from most law courses, because it combines College Work with the Professional.

See article in another column and send for catalogue.

TRAINING ILLINOIS TEACHERS.

Nearly 4,000 students from Illinois have attended the Central Normal College. Many of these completed regular courses, but a majority came for review work, and special training for teaching. A former county superintendent, of a large county in Illinois, told his teachers that he was always pleased to see them go to the C. N. C., since they always got something they could use in their schools. The institution has made a reputation for practical work in all departments.

At this time the strong work offered in the common branches will be just what is needed by Illinois teachers, in preparing for the new state examinations. We extend an invitation to high school graduates, and others to come, at any time in the year. You can enter any day and have perfect liberty in selecting your studies. We will help you, in every possible way, to meet all the new requirements.

We learn from an article in the School News, by Prof. U. J. Hoffman, State Supervisor of Country Schools of Illinois, that many applicants for license have failed. He urges high school graduates to attend a normal school and give all the time to the common branches and to pedagogy. We take one paragraph from his article.

"If you have failed to get the certificate, which under former conditions you had a right to expect, you will of course be greatly disappointed, but you should not lose courage. A new order of things has come about. The people mean to have teachers for their children who know the subjects which they are to teach. You come on the stage at the time of the change, and must suffer the inconveniences due to the change. It will be better for the teachers, for the children, and for the parents. You will get better pay, in return for better preparation and better work. You will be more secure in your position. You will have more satisfaction in your work."

Your expenses in Danville will be reasonable. This school has been known for thirty-nine years as one where a liberal education is within the reach of any deserving and industrious person. Ask for the new catalogue.

Harry T. Starnes is arranging to attend college another year.

Harley Manliet has been elected President of the Y. M. C. A. for next year. He and Ben Harrison were sent to Lake Geneva, Wis., as our delegates to the big Y. M. instruction school.

TRUSTEES TRANSFER TO COLLEGE.

Many township trustees, who do not maintain a high school transfer their pupils to College instead of to a town high school. A new Indiana law provides for such transfers.

An important advantage in the Central Normal College is that the student can have Commercial or Vocational subjects, as a part of the course. These are not offered in many small high schools, and in none of them will the facilities be so good as in the Central Normal College. A desire to secure work in one or both of the above lines will make a legal excuse for asking the trustee to transfer here.

Expenses are usually much less in a College town, and good rooming places are abundant. In Danville a student secures board and room for about \$3.00 per week, often for \$2.50 while he would pay \$4.00 or more in a town with a good high school.

If you are entitled to a transfer for your high school course, ask your trustee to send you to the Central Normal College. The law allows you to choose your school.

The Academic department of the College has been made a commissioned high school by the State Board of Education.

If this does not make the matter clear to you, please write to us.

VOCATIONAL TRAINING.

During the last two years there have been about 400 students each year in vocational classes. Not many schools have enrolled a larger number for this line of work. The facilities will be much better next year.

DOMESTIC SCIENCE: The new Vocational Building provides two large kitchens, and all needed space for sewing. The equipment will all be new.

AGRICULTURE AND MANUAL TRAINING: When the Science Department moves into the new building, there will be roomy quarters in Recitation Hall for these two departments. The Agriculture classes will use the present chemical laboratory for their laboratory work. A large lecture room for their use is on the same floor. There are two rooms for Manual Training. A standard equipment will be provided, so that any kind of wood work can be undertaken.

You will not be disappointed if you enter this department.

J. B. Clark, Lawyer of '08, is practicing in Inez, Ky. He sends a substantial check for the Equipment Fund.

THE PRESENT SUMMER TERM.

All college friends are much pleased with the attendance this summer. The enrollment may reach 800. While this exceeds any former summer term, we are much pleased to say there has been no difficulty in providing good accommodations. One hundred more students could easily have been located. We believe Danville can properly care for 1,000 students and we will try to increase the attendance to that figure.

The college buildings will now be ample we think for the above number, but if not the rooms of the high school will be available, as heretofore. That building provides good recitation rooms, and is conveniently located.

We are gratified to see so many school superintendents and other mature teachers in attendance. There is a rapidly growing confidence in the college work of the institution. The Training Department is the largest in the school, but there are about one hundred men and women at work on college credits. We should count with the advanced workers about sixty in the Standard Normal Course. All these people intend continuing until they secure the A. B. degree.

A TRIBUTE TO C. N. C.

C. A. Hargrave,
Danville, Ind.

My Dear Friend:

I have your notice that my pledge of \$50.00 for new building is due and I herewith enclose my check to your order for \$50.00 in settlement of same. I would like to see the new building named after one of my old professors, Adams, Steele or Huron but you know best.

We have many and urgent appeals to help our own institutions but I am glad to help C. N. C. for I verily believe it did more than any other institution to start me in life. But for it I might still be farming the clay points near Portland Mills, Ind.

I had to earn my own way through school and had it been necessary for me to choose between a high priced state school or stay at home I fear I would have stayed at home. The C. N. C. has a great field and is doing a great work and I am so glad to see her prosper. I think she has a great future before her. Last summer I visited Eaton, Rugby and Oxford in England but I would prefer that my boy, if I had one, should attend C. N. C. To spend a fortune on a boy in school, as they do over there, and in many places in this country, is almost a crime.

I am in hopes C. N. C. will always be a school for boys and girls living economically and attending for the purpose of preparing themselves for the realities of life and the betterment of humanity.

Sincerely yours,

JOHN C. NICHOLSON,
State Agent for Kansas, at Washington, D. C.

Dennie Bays sent us three students this summer. He contemplates returning next spring.

Jno. V. Smith, Sci. '12, is located at Tallbridge, Wash., where he has been re-employed as teacher at an advance of \$17.50 per month. He is pleased with that new country and will remain there.

INVITATION TO COMMENCEMENT

A cordial invitation to attend the annual commencement, August 7 to August 12, is hereby given to all the alumni, former students, and other friends of the college. Come to remain as many days as you can.

There will be a public entertainment in the chapel every evening. Wednesday, Aug. 11, is Alumni day. Visitors will devote the days to observing the class work of the college, and to reunions of former graduating classes. The Scientifics of 1890 will hold their first quarter-century reunion. This is a large class and a full attendance is expected. They will give hearty welcome to any friends of the old days. No member of the class should miss this great event. No one can fully appreciate, in advance, the pleasure of meeting his intimate associates of twenty-five years ago. Participation, only, will enable one to properly estimate its value.

The new Science Hall will be dedicated on Thursday. This will be the greatest event in the history of the college since the dedication of Chapel Hall in 1891. Every one of the nearly one thousand contributors to the building fund will want to be present. They will be made welcome.

Let us make this the greatest commencement ever held in Danville.

TWELVE WEEKS' TRAINING THE FALL TERM.

Some high school graduates will want to get ready to teach in 1916. They will take the Class A Training Course of Twelve Weeks, which will count two or three credits on the Standard Normal Course, and eventually on the A. B. course. Then teach one school. Return for the Class B training course, which will increase the wages while teaching, and count two or three credits on the above courses. Then teach another term, by which time you should be able to remain in College until graduation. This plan requires only enough money to pay expenses one term. After that you are independent.

OUR SCIENTIFIC GRADUATES: The graduates of our old B. S. course should return for the Standard Normal Course. Those who had planned to take the old Classic Course will find this the best substitute. All our former students who have been looking forward to the Scientific, will find the Standard Normal will serve even better. It is now the best thing the C. N. C. has to offer. Write to us, listing your credits, and we can tell you to what advanced standing you are entitled.

One has better opportunities in the Model School during the fall and winter, since there are not so many students observing. Many will find it profitable to remain in College two terms. One term devoted to reviewing will so increase the general average on examination for teacher's license, as to give higher wages. It is possible, in that way, to get back while teaching your first school, all the expenses of this extra term.

C. N. C. GRADUATE IN A HIGH POSITION.

U. J. Hoffman, Teacher of 1878, is now State Supervisor of Country Schools of Illinois. Like Indiana, Illinois is in the throes of a school revolution. Great changes in the school laws were made by a recent legislature, and they are now going into effect. One new feature is a requirement that licenses for country teachers shall be issued by the state, and not by county superintendents as heretofore.

We congratulate the state on securing the services of so competent an educator as Prof. Hoffman, in this responsible position. No one knows the public school system better. We consider him one of the very strongest school men we have ever known.

Caroline Rupp, Classic of '99, is a teacher in Brazil, Ind.

THE LAW COURSE.

The first law class was graduated twenty-four years ago. There has been a class every year. The course includes the usual subjects and the usual special drills in court practices. That the work is highly practical is proven by the success of the graduates. We think of them now in the legal department of the United States at Washington, serving as U. S. district attorney, on state supreme and appellate courts, as judges of county and city courts, as authors of treatises on the law, as prominent attorneys in Washington, Columbus, Cincinnati, Louisville, Indianapolis, Chicago, St. Louis, Denver, Seattle, San Francisco, Los Angeles, Honolulu, and in a host of smaller cities. This four years' course in law may be combined with the four years' College Course. This advantage is a most valuable one, since it gives a wider mental training, and more general culture, than the usual law course, two things that may have as much to do with one's success in the practice of his profession as the knowledge of the law.

Statistics, recently collected, show that the number of lawyers is decreasing, as compared to population. This is encouraging to a young man who contemplates entering the legal profession. Start your course in the C. N. C. You will be started right, and have exceptional opportunities to advance rapidly.

THE STANDARD NORMAL COURSE.

The Indiana State Board of Education has classified all the educational institutions of the state. One division is known as "The Standard Normal School." In this the board has placed the Central Normal College. There are but three others. The standard normal course of study is open to High School graduates, and can be completed in nine terms. A and B courses give one and two terms advanced standing, thus shortening the time. The graduate of this course is qualified, by order of the State Board, to hold the commission of a high school.

Every Indiana teacher should aspire to the distinction given by this course. It is easily in reach of every one. It opens the way to the highest positions in the public schools of the state.

After becoming a Standard Normal graduate it is but a short step to an A. B. degree, since the credits on this course count on the Four Years College Course. For a majority of our students it is the first aim.

A GOOD PLAN:

A High School Graduate, without sufficient means to attend college for a long period, should consider this plan: Take the Class A Training Course of Twelve Weeks, which will count two or three credits on the Standard Normal Course, and eventually on the A. B. course. Then teach one school. Return for the Class B training course, which will increase the wages while teaching, and count two or three credits on the above courses. Then teach another term, by which time you should be able to remain in College until graduation. This plan requires only enough money to pay expenses one term. After that you are independent.

OUR SCIENTIFIC GRADUATES:

The graduates of our old B. S. course should return for the Standard Normal Course. Those who had planned to take the old Classic Course will find this the best substitute. All our former students who have been looking forward to the Scientific, will find the Standard Normal will serve even better. It is now the best thing the C. N. C. has to offer. Write to us, listing your credits, and we can tell you to what advanced standing you are entitled.

ATHLETICS.

The Central Normal College is winning a place in Athletics in the state. Our teams have won many victories during the past two years, both in basket ball and base ball. The schedule has been a very difficult one but our teams have perhaps as large a number of victories to their credit as any other school in the state.

Our splendid park has given us the very best athletic field used by any school in the state. This gives us an opportunity not only to compete with other colleges but also to have inter-class athletics of all kinds which is of material value to our student body.

A general system of indoor athletics will be established for both women and men. We expect to organize gymnasium classes under a regular instructor. Our large gymnasium will give ample room to carry out any system that we may wish to inaugurate. The writer has always felt that a true spirit in athletics demands that every student in the school must take part. Of course

there must be teams to represent the school in competition with other schools but a Normal School must in still a spirit of athletics into the student body. All teachers should know the leading games and such exercises as will enable them to direct athletic training in any common or High School of the State.

With our excellent equipment we will not only be able to cope successfully with all schools of our class in the state but what is far better we will provide training classes in general athletics where all of our students may learn how to direct athletics.

THE CENTRALIAN.

The C. N. C. annual, by name the Centralian, is issued each summer by the students. The current number is an improvement on preceding issues. It records the events of the year in the various departments of the college, gives class histories and contains many illustrations.

This year the book is dedicated to C. A. Hargrave.

SCIENCE HALL.

The new Science Hall is nearing completion and will be ready for use at the opening of the Fall term. It is not a show building, but its plain brick walls, with moderate stone trimming, make it attractive. It is located at the rear of the east end of the campus, facing Main street. A beautiful stretch of lawn lies in front, liberally shaded with spruce and forest trees. A noble elm of great size stands next to the sidewalk.

There are three floors. The first or basement story, almost all above ground, contains the gymnasium, the spectators gallery, with accommodation for 250 persons, six toilet, bath and dressing rooms, and several storage rooms.

The next floor is divided into a large social hall and lecture room, two commodious kitchens and a dining room.

The sewing classes will meet in the lecture room. This entire floor is for the Domestic Science Department, but the intention is to use the large hall for class meetings, receptions, banquets, etc. It will be available for evening gatherings. If possible the annual banquet of the alumni will be given there this year, and be prepared in one of the new kitchens.

The top floor is for Physics and Chemistry. There are four large rooms, two for laboratories and two for recitations. There are seven small rooms, one of which is for a weighing room, another for a dynamo room, another for photography. The others will be for apparatus and chemicals.

The building will be heated by steam, a large boiler house having been constructed not far away. There will be a hot water system, so that sinks, laboratories and baths will be provided with both cold and hot water.

College friends take pride in the fact that the general contractor, Mr. Roy C. Bryant, of Franklin, Indiana, is a graduate of the C. N. C. The face brick were made by Mr. C. A. Pritchard, of Indianapolis, also a former student.

Plans are being made for the dedication exercises to be held commencement week. You are invited to attend.

DANVILLE CONTINUES DRY.

Through the influence of three or four men, who desired to open saloons in Danville, a local option election was forced upon the town and township. It occurred June 3, and resulted in a victory for the "Dry" forces, the majority being greater than two years ago.

Some are predicting that this will be the last option election to be held in Danville, and we hope these are the words of good and true prophets. It appears, however, that the would-be saloon keepers have a sufficient following to force an election every two years. The prospect of failure may discourage them. Danville is a dry town and the best citizens are determined that it shall remain so.

Laura Shonkwiler is now Mrs. Howard Van Auker and lives at Clover Valley Farm, Brocton, Ill.

COLLEGE NOTES.

Pres. Laird has had many calls to give commencement addresses. He has accepted one or two for nearly every week of the season. One was to the township in Howard Co., Ind., in which he taught his first school.

The Danville Commercial Club will manage a lecture course next winter. Profs. Whisler, Driver, Towell and Hargrave are members of the Committee that selected the course. There will be five most excellent numbers, at a popular price.

Prof. Enloe was compelled to give up his law work, temporarily, early in June, on account of a throat trouble. He is now at his summer cottage in northern Indiana.

Prof. J. P. Snodgrass has resigned as Prosecuting Attorney of Hendricks Co., and accepted the principalship of the Danville grade school. He held this position before he was elected prosecutor.

Mrs. Olcott has given almost all her time, this summer, to the training classes. She has, in this way, reached about 200 teachers with her admirable courses in elementary manual training and primary methods. She is believed to be the foremost Indiana authority in this line. No courses could be more practical.

There are ten large classes in American and English literature, six in Grammar, eight in Domestic Science, and three to five in several other subjects.

The cooking and sewing classes are making almost continuous use of the equipment provided for them. Several lady students are giving all their time to these subjects. A few gentlemen are learning to sew, since they are compelled to teach it in their schools.

The Agriculture Department has a garden, in which school gardening is being taught by practice.

The Vocational Club is large and enterprising. They secure expert talent as lecturers. One lecture was by Dr. G. N. Wickwire, of the U. S. Agricultural Dept., his subject, "Hog Cholera." He has been engaged for years in the campaign to control that disease. A series of three lectures were given by Dr. Edwin S. Todd, of Miami University.

Prof. Thomas now has two rooms for his biology classes. One is a laboratory, well exposed to sunlight, so that experiments can be made with both plants and animals. He gave a laboratory course in Physiology the third term.

Lee L. Driver, Teacher's graduate of 1883, County Superintendent of Randolph County, Indiana, lectured before the C. N. C. Educational Club, June 3. He gave an illustrated lecture on Consolidated Schools, on which subject he is an authority, his county having no other kind.

The summer term brought us a large number of married men, who are here for Class C, College Course, and Vocational Work. There are more than twenty, the most of whom brought their families. We all much enjoy having these mature, earnest men in our classes.

Wayne Jarrel, Ft. Gay, W. Va., last attended the C. N. C. in 1885. He thinks he will attend commencement this year. We will be glad to have him here.

TEACHERS TRAINED IN C. N. C. ARE WANTED.

More calls have come to the Central Normal College for teachers this year than any other time. School officials know that a teacher trained in the Central Normal College is well qualified to make a success.

We need more students to take the Standard Normal Course. A young man with five terms in the Normal School can develop his salary about 40% by attending here four more terms or one school year. The outlook is very encouraging. Invest in yourself. You can not make a better investment.

WONDERFUL ART OF STENOTYPY.

Stenotypy is machine written shorthand. It has two advantages over pencil shorthand. (1) Much greater speed can be attained. This really puts the machine writer in a different class from the pencil writer. (2) There are no individual peculiarities in the written work, so that any one who knows the system can read the notes of another writer as well as his own. One can soon learn to read it. This enables one machine writer to take dictation for three or four transcribers on the typewriter. It also makes it possible for court proceedings to be copied more promptly.

Every court wants a stenotypist, but it will be a long time before all can be supplied, since stenotypy is now only in its second year.

There is a good position awaiting every student, as soon as he completes his course. The C. N. C. is a Stenotype school. The course can be had here at much less expense than in a city business college. Investigate this now.

Special circulars will be sent on request.

PERSONALS.

Julia E. Zeigler, Sci. '07, is an instructor in the Commercial Department of the East Chicago High School.

Howard Kinnaman graduated from Earlham College in June. He will attend an eastern Medical College next year.

J. E. Funk, Teacher of 1895, is now President of the Fidelity Investment Co., of Salt Lake City. The old boys are everywhere.

Chas. F. Basler, Com'l of '06, made us a visit June 4. He is now in the house furnishing business at Hopkinsville, Ky.

C. M. Barksdale is in the U. S. postal service, living in Indianapolis. He sends a sister for the training work this term.

Supt. J. W. Strassell, of Spencer Co., spent a few days with us in June. He left his daughter for the Class A training course.

Robert Lusk, Sci. of 1912, has been teaching in his home county since graduation. He is planning to return to college in the near future.

L. O. McKibban has been re-elected principal of a grade school in Frankfort, Ind. He has already served seven years in the position.

T. E. M. Osorio, Classic and Lawyer '09, has an office in Honolulu. He recently favored us with a large book, describing the islands and its industries. We thank you, Tristan.

O. L. Chance was a prominent student years ago. He is now a general merchant in Connersville, Ind.

D. B. Sherry, Classic of '82, is still teaching. His home is in Montana but he taught last winter at Boxley, Ga.

E. G. Anderson, Student of '08, is a successful Illinois teacher. He has the promise of a superintendency next year.

Russellville, Ind., sends one of the largest delegations for Class A work. C. T. Malan, Classic '06, is superintendent there.

Sarah M. Ritter taught this year in the Winthrop Normal and Industrial College, Rock Hill, S. Car. She is a Sci. of '91.

Mildred E. Young, Teacher of '91, after teaching fifteen years, attended and graduated from Medical College. She is located in Chicago.

E. J. Klemme, Classic '94, writes for the School News, Taylorville, Ill. He is an instructor in the State Normal School at Ellensburg, Wash.

Otis Edgington, student of '89, called at the college in May. He is a manufacturer of glass bottles, his factory being located at Eaton, Indiana.

Frank Hopkins has vacation employment in Indiana, in directing Purdue extension work among the children of Hendricks Co. He is overseeing their garden and corn plats.

G. C. Babb is now farming in Fountain Co., Ind., but may resume teaching. Two dry seasons in succession have given him short crops. He does not forget to recommend the college.

Frank Wagner, Classic of '82, the best artist among our alumni, has pictures in the Art Gallery at the Panama Exposition. This is a great honor for a young artist. His studio is in Chicago.

Dr. C. L. Shipley, of Vermilion, Ill., called at the college, June 8. He was a student here in 1904. He was on an auto trip through Indiana and came to Danville to see the town and a few remaining friends.

Andrew Reed, Com'l of 1900, is stenographer for the Belcher Land Mortgage Co., of Ft. Worth, Texas. He has held the position for ten years, and now receives the largest salary we have ever known a stenographer to receive.

Lewis C. Rush, formerly L. C. Musrush, is a lawyer in Denver, Colo. He gives one-half time as assistant district attorney and one-half to his private practice. He hopes to attend a reunion of his class commencement week of this year.

Mr. and Mrs. Luther Manning, of Morrisonville, Ill., sent a son and daughter for the summer term. He was a student in the college long ago. She was Gertrude Roberts, Sci. of '95. We are pleased with this substantial indication of continued fealty.

A. C. Bower, of Cleveland, sent \$120.00 for the new building. We quote from his letter: "I feel that the thirty weeks spent in the C. N. C. was the most valuable piece of time that I have ever invested, and I am glad to have this opportunity of doing a little for the institution which has been so much to me through life." Mr. Bower attended commencement last year and helped to push the building fund over the line.

J. Emory Hutchinsin is in the Indiana Summer School at the Biological station at Winona Lake. He got such an interest in Zoology while in C. N. C., that he can not stop.

F. M. Sageser has been re-elected Principal of High School of Westport, Ind. He is now a licensed minister in the M. E. church. There is no better booster for the C. N. C. He sends or brings a strong delegation every year.

N. B. Ferguson, of Ft. Gay, W. Va., writes to renew acquaintance with the college. He was a student in 1884. A dream of the college and of his instructors led him to write to us. We wish some more of the old timers would have dreams.

Bex A. Trimble, Lawyer '12, is practicing law in Mt. Vernon, Indiana. The new firm has started off well, having a good list of cases for the next term of court. Bex is being talked of for the Democratic nomination for prosecuting attorney.

Oren S. Hack, of Indianapolis, re-deemed his pledge early. In his letter he said: "I want to congratulate you upon the campaign you made to obtain funds for your new building. You always accomplish what you go after, and that characteristic you inculcate in your students."

Harmon S. Moseby, who left the Scientific class of '99, before graduation, to become County Superintendent of Perry Co., Ind., is now principal of Antioch State High School, Red Springs, N. Car. He also operates the New South Teachers' Bureau.

Victor Aldridge, the best pitcher ever developed in the C. N. C., is advancing rapidly as a professional ball player. He is making a great reputation in a western league, and it is predicted that he will soon be promoted to a regular position with the Indians of Indianapolis.

Friends of Jno. M. Lewis, Classic '95, have announced him as a candidate for the nomination for Lieutenant Governor, on the Republican ticket. He has long been prominent in politics in his district. He is now chairman of the district committee. He is worthy the above office.

S. D. Dimm, Sci. '83, called at the college the first week of July. He desired to see the place once more, and the few friends remaining in Danville. We much enjoyed his visit. He is engaged in the coal mining business in Denver, Colo. He was on his return from an extensive trip east.

J. W. McCracken, Teacher of '90, was a student at several times. Mrs. McCracken was a student of the music department. He has been a teacher almost all the time, but owns a rice farm in Arkansas. A daughter born while they were in Danville expects to attend here.

L. K. Wood, Lawyer '09, is now practicing law in Chicago, with a large law firm. The office is in the Rookery Building. From a long letter we take the following paragraph: "Things certainly are looking good for the college and I am sure its days of growth are just beginning. If this be true we all have cause to rejoice. If the past be any criterion by which to prophesy, the C. N. C. of 1925 will be the most worthy, most efficient and most loved college in the Commonwealth of Indiana."

J. Hardin Thomas, Classic '04, is superintendent at Medora, Ind.

Martin Conrad will teach again next winter and then return to college.

B. H. Friend is located at Warren, Mont. He hopes to return to college in a year or two.

E. L. Fisher is again in college. He has been elected superintendent at Kewanna, Indiana.

J. H. Daugherty is now a student in the Southern Baptist Theological Seminary of Louisville, Ky.

Cornelia Luscomb has been re-elected as Director of Music in the State Normal at Flagstaff, Arizona, at an increased salary. She had a short vacation in May that she spent with home folks in Danville.

B. J. Burris, Lawyer of '12, is practicing in Washington, Ind. He made a handsome pledge to the building fund. Of it he says: "I have never received as much pleasure from spending money as I expect to enjoy from the small donation I have made."

Eva Campbell Boxley is bookkeeper in her husband's piano store in Rushville, Ind. She is a commercial graduate. She says: "I have a very warm spot in my heart for the C. N. C. The business course I received there has been worth many times over what it cost. I will always commend the school."

S. B. Groom, Sci. '08, is located at Lakeport, Fla., on Lake Okechobee. He is teaching. He is much pleased with that new country. He is fifty-one miles from the county seat and railroad station. The county is sixty miles wide and ninety miles long. Wild game is plentiful. He has shot an alligator several feet long, and fried alligator steak.

Fred N. Duncan was in Germany for a year's university study, when the war began. He got out of the country, at great expense, and has spent the year in Columbia University at New York. In September he will begin his work in the University of Texas, where he has been elected to the chair of biology. He is a Classic of '97.

Tom Breitwieser, Sci. '08, is assistant teacher of Educational Psychology in the Indiana State Normal. He and five more of the class held a reunion at the home of Jennie Asbury at Coalmont, Ind., May 30. The others present were Myrtle Barnett, Alice Bullington, Della McCauly and Russell Spencer. They had a big time, and say they now feel nearer the C. N. C.

We quote from G. E. Johnson's letter, in which he sent Canadian exchange for two hundred dollars, for the building fund, from his home in St. Peters, Cape Breton: "It is pointed out that it is good for one to give until he feels it. If this is the case circumstances have conspired to make me feel it more just now than at any other time for a long while, but it is all right and the difficulties will soon be passed. It is a great pleasure to be able to join in this effort which I know means so much to you and so many others of our old friends, besides what it will mean to the coming thousands of students who will be benefitted by having the new building. I am glad it is to be a Science and Athletic home."
