### The Attention of Young Men

In selecting a college, you desire to choose one of good reputation in the educational field. What better way of forming a correct estimate, than to note the successes of the former students? It is for that reason we present the above group of nine men now in important offices in the Indiana state house. Since the group was made, Mr. Geo. M. Crane, a classic graduate, has been selected chief counsel for the State Accounting Board, and also has an office in the state house. Of these ten men, six did not attend any other college, after graduating from the C. N. C.

It is believed that no other institution has, at any one time, furnished to the state so many eminent officials. While this may never again occur, it is worthy all the prominence we give it.

Similar groups could be made up of college presidents and professors, city school superintendents, lawyers, physicians, manufacturers, etc.

At this time nearly one-third of the county superintendents of Indiana are C. N. C. men. At the last meeting of the Indiana State Teachers' Association, C. N. C. men were given the following positions: Three of the

seven vice-presidents, one on the executive committee, one on Reading Circle Board, two on legislative committee, one on resolutions committee. There are three C. N. C. men in the faculty of Indiana University, two in Purdue, one in Leland Stanford, one in University of Texas, and many others in similar institutions throughout the country.

It appears that no gates are closed to C. N. C. men.

### Four Years' College Course

The graduates of the past were limited to a course of 96 weeks. College officials hope that the new course of 144 weeks will prove to be of greater value and greater inspiration to the students of today and the future.

This is a regular College Course, on the credit plan, the same as required by the Indiana State Board of Education in Standard Colleges, and leads to the degree of A. B. It is open to High School graduates and others of equivalent preparation. It can be completed in three calen-

dar years, due to the fact that we have Forty-eight weeks of School Each Year. Those desiring to take their degree from a university can save time by attending the Central Normal College one to three years. There are other advantages:

The attendance is not so large, therefore the student has a better opportunity. Danville is the Ideal College Town, hence there are fewer things to attract the student from his work. The instructors are selected for their especial fitness for the teaching they are to do, hence universities everywhere accept Central Normal credits. Students become well acquainted with their teachers, which is of far greater importance than most young people realize. There is every needed equipment, and ample library facilities for all the work presented. Expenses are about one-half those of a University, and much less than in most Colleges.

### Especial Advantages For a High School Graduate Who Cannot Attend Three Successive Years. Consider This Plan.

Take the Class A Training Course of Twelve Weeks, which will count two credits on the College course. Then teach one school. Return for the Class B training course, which will increase the wages while teaching, and count two credits on the College course. Then teach another term, by which time you should be able to remain in College until graduation. This plan requires only enough money to pay expenses one term. After that you are independent.

### Class C. Course for Teachers.

Many who read this would find it profitable not to teach next year but to come to the Central Normal College for the Class C course. This is now a Standard Normal School, by order of the State Board of Education, so that the graduate of the Class C Course can hold the commission of a high school. That is the greatest achievement in the public school system. One with this qualification may, by proving it's worth, aspire to the most prominent city superintendency. Class A and Class B Courses give credits on Class C. You may be entitled to advanced standing. Correspondence will be given prompt attention.

### A Course of Law.

A four years' course in law may be combined with the four years' College Course. This advantage is a most valuable one, since it gives a wider mental training, and more general culture, than the usual law course, two things that may have as much to do with one's success in the practice of the profession as the knowledge of the law. This department has sent out many good lawyers, during the past twenty years. One does not have to be a high school graduate to enter this Course.

### Other Courses

Review Classes, Every Term; High School, either Certified or Commissioned; Business, including Bookkeeping, Business Training, Shorthand Stenotypy, and Typewriting; Music—voice, piano, violin, etc.; Music Supervisor's; Cooking, Sewing, Manual Training, Agriculture.

This is Important:

There is no other Normal College in Indiana organized like the Central Normal College. It is incorporated under a recent Indiana law, without capital stock. It belongs to no one, but by law is controlled by a self-perpetuating Board of Trustees. It can not be sold, or moved. Every cent paid to it must be expended to defray expenses or to make improvements. It is a permanent institution, with an enviable reputation, and worthy of the support of any young person. As Governor Ralston said: "There is not another College in the State, I challenge them all, that has produced a greater number of men who have gone out in the world and made their mark."

### Educate for Business

Thousands have prepared for Business Positions in the Commercial Department of the Central Normal College. You can do the same. Superior Courses can not be found.

The Combined Course includes Bookkeeping, Business Practice, Short hand, Typewriting, English Grammar, Composition, Arithmetic, and Penmanship.

Instead of pencil Shorthand the student may choose Stenotypy, the Wonderful Machine Way in Shorthand.

Expenses are Less than in most schools—only about one-half as much as in many.

Send for the New Catalogue.

J. W. LAIRD, President.

### High School Work in College

The Academic Department of Central Normal College presents a commissioned high school course by authority of State law. This work runs all the four terms of the year. One can begin the course at opening of any term. See article on another page.

You may be entitled to a transfer so that your township will pay your tuition. See your trustee or write to us.

J. W. LAIRD, President.

### College Notes

Prof. and Mrs. Gaston spent their vacation visiting relatives in Ohio.

Miss Ethel Means is teaching in the high school of New Augusta, Ind.

Prof. Driver and family spent their vacation camping in Hancock county. He came back much improved in health.

Prof. W. R. Hough is superintendent at Oakland City, Indiana. He enjoys his summer teaching in the C. N. C.

Prof. Lochmuller, our summer instructor of German, is principal of the high school at Tipton, Ind. This is his second year there.

Prof. W. F. Collins is superintendent at Litzon, Ind. He is looked upon as one of the strongest superintendents of the county.

Prof. I. W. Conner is superintendent at Colfax, Indiana, this year. He goes to a better place every move he makes. He is a strong school man.

Prof. and Mrs. Luscomb are now receiving their friends in their handsome new bungalow on North Tennessee street. They have a delightful home.

Prof. Ratliff has purchased a new automobile. He bought it the first of the vacation and in a day or two

went off to northern Indiana in it, for a vacation on a lake.

Prof. Elloe is special judge in a big ditch case, now before the Clay county court. He will be there five or six weeks. Prof. Snodgrass is in charge of the law classes.

Pres. Laird spent a week in Arkansas with Prof. Earl Swindler. They were out in a big forest after deer, but were not fortunate enough to see any. They feasted on squirrels and had a great time.

Rev. Edgar Moore, "Major," has returned to his charge at Avon, Ind., and will continue his studies in the C. N. C. His motorcycle will be as common a sight in front of the college as during the past two years.

The C. N. C. Booster, a paper published by the students, is more interesting than ever before. Chas. A. Dodd is editor. His assistants are Edgar Moore, L. C. Winterheller, John Boswell, and Elizabeth Luscomb.

The big rain that came soon after commencement revived the grass on the campus and it was soon as beautiful as in early spring. It never was prettier than now, the green grass showing through a thick layer of brightly colored leaves from the trees.

### FORWARD!

Big Representation of C. N. C. Graduates at State Association.

At the recent meeting of the Indiana Teachers' Association held in Indianapolis, C. N. C. graduates were very much in evidence. Not only were they there as mere school teachers, but also when it came to selecting the officers and committees, they were given unusual recognition. Besides two vice-presidents, there may be found on each of the four important committees one or more C. N. C. graduates.

This certainly speaks well for old C. N. C. and predicts that when the time arrives, men will not be lacking to fill the NINE state offices now held by former C. N. C. students. We are certainly proud of our Alumni and to them concede all the honor of making C. N. C. the Grand Old Institution that it is today. A great many of the students that attend come because their fathers or mothers graduated from the Old School years and years ago, or because they have been advised to come by some friend, perhaps their teacher.

Again, do you realize that C. N. C. is growing better each year and that this forward movement is destined to place it among the foremost schools of the state? You need not hesitate, Dear High School Teacher, in advising your graduates to come here for their training work or for their regular A. B. degree, because we can give them the very best. You remember our mark for next summer—ONE THOUSAND. This will be easy to accomplish if every student in school and every C. N. C. teacher in the state will make himself or herself a committee of one to influence at least one person to enroll with us next summer. Don't fail us; we are counting on YOU.

—C. N. C. Booster.

### THE EQUIPMENT COMMITTEE.

In order that the trustees of the college may have the entire building fund to put into the new Science Hall, and the heating plant, the students of this year propose to raise a fund for supplying the equipment for the new rooms and the gymnasium. Three thousand dollars will be needed. A committee of students will soon be at work, corresponding with former students and other friends of the college, asking for contributions. If you receive a letter, please give careful consideration. You will not often have an opportunity to place a few dollars where they will do so much good.

The students of the summer term of 1914 subscribed more than \$2,000.00 to the building fund. A number of young men, who teach during the winter and attend college during the summer, gave \$50.00 each. Almost every student gave something. Many joined the ten dollar club. This indicates the strong faith the present patrons have in the college, and should encourage those who are graduates. The committee will accept pledges of any amount. It is their ambition to make the equipment of the new building equal in service to that supplied by the richest institutions.

The committee will send out blank pledges, the money to be collected later by the treasurer of the Building Committee. Any cash or checks sent the committee will be turned over to the treasurer.

The committee desires all the help you can give. If you can solicit from friends do so. Blank pledges will be sent to any one on request. The committee cannot locate a large number of the alumni, and you can help by sending addresses.

Let every one be a Booster.

Russell Landis, of '14, is superintendent at Fairland, Indiana.

### WONDERFUL ART OF STENOGRAPHY.

Stenotypy is machine written shorthand. It has two advantages over pencil shorthand. (1) Much greater speed can be attained. This really puts the machine writer in a different class from the pencil writer. (2) There are no individual peculiarities in the written work, so that any one who knows the system can read the notes of another writer as well as his own. One can soon learn to read it. This enables one machine writer to take dictation for three or four transcribers on the typewriter. It also makes it possible for court proceedings to be copied more promptly. The testimony of one day may be available for use in the court room the next day.

Every court wants a stenotypist, but it will be a long time before all can be supplied, since stenotypy is now only in its second year.

There is a good position awaiting every student, as soon as he completes his course. The C. N. C. is a Stenotype school. The course can be had here at much less expense than in a city business college. Investigate this now.

Special circulars will be sent on request.

### EXPENSES IN C. N. C.

When a graduate of the Central Normal College goes to the university, he always finds his expenses almost doubled. It is a rare thing for a student in Danville to complain of the high cost of living. When one can secure a good furnished room at 50 cents or 75 cents or one dollar per week, there is no cause for complaint.

During the present term, students are paying \$2.25 or \$3.00 per week for their meals. With a good meal for less than eleven cents comes satisfaction.

Tuition is \$18.00 for a term of three months. In some state universities, where tuition is free, the various fees that the student must pay often amount to almost as much as our tuition, while all living expenses are higher.

It does not cost much to obtain a good education in the Central Normal College.

### THE TEN DOLLAR CLUB.

During the summer term the Ten Dollar Club was organized to raise the last \$3,000.00 of the \$25,000.00 building fund. The object was to secure ten dollar subscriptions to the fund. Smaller sums were accepted. The following made up the committee: J. W. Laird, G. E. Lochmuller, R. E. Swindler, I. W. Conner, Fred Brengle, Louis Winterheller.

Lochmuller and Swindler made a successful trip to Bloomington to solicit from friends there. On the last night of the term the fund was completed, amid general rejoicing. The students of the summer term subscribed more than \$2,000.00. In order to arouse interest the committee made a big clock face, with three hands. Upon this clock the total of the fund was marked up, from day to day. This committee deserves great credit for its achievement.

Homer Hargrave, Sci. '14, has entered I. U.

NEW SCIENCE HALL.

### NEW SCIENCE HALL.

At this time we can only show the architect's drawing of the front of the new building. The contract has been let, and the workmen are now putting in the foundation. Next summer we can show you the entire structure, if you will call.

This will not be the largest college building in Indiana, but it will be one of the very best, as far as equipment, convenience and usefulness count. It will almost double the capacity of the college. Instead of the usual central entrance, you will note one at each end. This makes a great saving of floor space, and prevents the crowding of hallways. On the second floor there will be no corridors, but every square foot of floor will be available for school use.

The well-lighted and ventilated

basement is a gymnasium. The main floor is 36 ft. by 70 ft. On one side of this is a spectators' gallery that will seat two hundred persons. There will be, on this floor, two toilet rooms, two dressing rooms with lockers, and two bath rooms.

The first floor is devoted to Domestic Science. There are two large kitchens, a dining room, a sewing room, a large lecture room and several store rooms and pantries. The large sewing room and the lecture hall can be thrown together and will be used for socials and banquets. On this floor there is also a living room for the caretaker. It is the intention to equip the kitchens and the sewing room with everything that can serve a good purpose in giving practical sensible courses.

The second floor is entirely given to physics and chemistry. There are

two lecture rooms and two laboratories. There are eight other rooms for apparatus, chemicals, dynamos, weighing, photography, etc. There is also an office for the instructors.

There will be a heating plant, so located that the steam can be conveyed to each of the three buildings. This will contain boilers of sufficient capacity to insure heating the buildings in the coldest weather.

When these improvements are complete the Central Normal College will have one of the most compact and useful plants to be found in the state. It should then be able to accommodate one thousand students. The summer term enrollment of 1914 was 725, and the members of the Booster Club think it will not be difficult to make an increase of 275. Why not every former student be a "Booster?"

### A GOOD INVESTMENT.

High school graduates who have some natural musical ability and have had some music work in the schools, should fit themselves at the Central Normal College as a Supervisor of Music in the public schools. A course of twelve weeks at a very little expense will fit a student to carry on the work thoroughly and if he can combine art, some vocational course or one of the common branches in addition to the teaching of music, a good salary is assured. Some of our graduates who do this, now draw salaries from \$95 to \$120 per month. Ninety-eight per cent. of those who have taken this course within the past five years, now have splendid positions. There is an increasing demand for teachers of music, especially those who are able to teach music with other subjects. There is no other training school in the middle west that has placed so many teachers of music into desirable positions and have prepared them more thoroughly in a shorter time than the Central Normal College.

Oliver Baxter is principal at Ekala, Mont.

Chas. Dickman, Sci. '13, is an instructor in the State Industrial school at Kearney, Neb.

Dr. A. R. McKinstry, with office in the Willoughby building, Indianapolis, was a student here in 1889.

L. A. Brown, lawyer '14, is teaching at Morrilton, Ark.

Carnie Spall, Classic '14, is principal at Forest Hill, Indiana.

Lester Moore has a position in the high school of Homer, Ill.

Cora Burton, Classic '13, teaches in the high school of Acton, Ind.

Nova Marting is instructor of Domestic Science and Drawing in Farm-land.

Tom Harney, '14, is instructor in Chemistry in Union Christian College, Merom, Ind.

J. J. Owen, Lawyer '14, is teaching at Hillsboro, Indiana. He is a veteran school teacher.

Shirley Ader, Classic '13, is in her second year as a teacher in Jonesboro, Indiana.

Jas. H. Snodgrass, '14, is superintendent of Gilboa schools, near Remington, Ind.

W. F. Collins is principal at Litzon, Indiana. His school has just been commissioned.

Jesse Neff, Sci. '13, is teaching in the high school of Berthold, N. Dak. He will return to C. N. C. for all of next year.

John Jollief is principal at Hazlewood. In a few weeks the school will move into a big new building.

Paul Good, who attended Bloomington University this summer, is superintendent of the public schools at Roll, Ind. Last year he was principal of the high school at Francesville, Ind.

Elsie Leak, Classic '14, is teaching in Mecca, Indiana.

Leland S. Hamilton is working out his master's degree in I. U. He is also an assistant in the department of history.

E. E. Wade is principal at Cutler, Ind., and E. P. Lowery at Burlington. Three high schools of Carroll county have C. N. C. principals.

L. C. Winterheller, '14, was elected teacher of science and German in the Danville High School. His chemistry class has laboratory work in the college laboratory.

Frank S. Roberts, lawyer of 1900, is now district judge in Lockhart, Texas. He served a term as prosecuting attorney before his election as judge. He is pleasing the patrons of the court. He sends us a liberal contribution to the building fund. We take the liberty to quote a paragraph from a recent long and most interesting letter: "Mrs. Roberts, also an old student of C. N. C., and I contemplate sending our son, George C., now thirteen years of age, to the C. N. C., at least for one year, before he completes his college education. You will remember that Mrs. R. and I met at the C. N. C., loved each other and were married there. We feel that our romance would not be complete unless George should attend one of the greatest educational institutions in the country for the really worthy poor boy and girl."

## Personals

Fred E. Brengle is principal of Deer Creek high school, with post-office at Camden, Ind.

Thos. J. Allstott, teacher of '07, is teaching on the Winnebago Indian Reservation, Winnebago, Neb.

Guy H. Wayne is teaching at New Amsterdam, Ind. He is planning to return for all of next school year.

Harry Slusser and Darrell Green are teaching in Illinois, and planning to return for all of the next school year.

C. M. Wood, student of '92, is a clothier in Princeton, Ky. He recommends the C. N. C. to his young friends.

Aug. W. Huber is in Washington, D. C., but he did not tell us what position he has. His address is 221 3rd St., S. E.

W. H. Templin, a student of the 90's, is a teacher in the Central High School, of Kansas City. He made us a call July 28.

G. W. Gambill, lawyer of '06, is practicing in Sullivan, Indiana. He is recommending our law course to his young friends.

Ernest E. Owens is teaching near Thorntown, Indiana, and recommending the C. N. C. to all. He says he has two students for us next year.

Leo Langham and his brothers have bought a store in Keyport, Ill., so that he is now applying the business training received in the C. N. C. last year.

Forrest Bradshaw, classic '04 was married to Miss Daisy Edmundson, of Balbac, Ind., July 15, 1914. They are now at home in Delphi, Ind. We extend congratulations.

Austin Sweet, a law student of long ago, is one of the leading attorneys of Terre Haute. He called upon us Oct. 31, 1913. It is a delight to have the "old-timers" drop in.

Ralph Kurtz, Lawyer, '14, is now in I. U.

Harley I. Manliel is teaching in Edgar county, Ill. His school began in August.

M. A. Kiger, law student of some years ago, is practicing at Harrison, Idaho. He sent us a student for this year.

G. Halleck Rowe, a student of the 80's, talks of moving to Danville to educate his daughters. We will be delighted to have the family here.

Mrs. Martha Scott Conser, a student of elocution twenty years ago, is now the foremost woman writer and speaker in Memphis, Tenn. She is entering upon a career on the Chautauqua circuit.

Dennie Bays is teaching in his home township in Greene county, Ind. He sent us two lots of specimens of Beech Drops, a parasitic plant he was unable to find near Danville last summer.

Edgar R. Mullins is teaching mathematics and science in the high school at Mounds, Ill. In sending names of prospective students he said, "I am more than glad to send the names because I know what the school is, and that they can not find a better place."

Dr. A. Beery, Sci. of '78, lives in Rushville, O. He has reared a family of eight children. He has not lost his interest in the C. N. C., although there is now no one connected with the college that he knew.

A. E. Bower, of Cleveland, O., was a commencement visitor. He had not been in Danville since he attended college many years ago. He entered heartily into the festivities of the week and helped the boys finish up the building fund. He and his father are heavy dealers in live stock at the Cleveland stock yards.

### CALLS FOR TEACHERS.

For several years the college has had many calls for teachers, after the supply was exhausted. This year the calls are more numerous than heretofore. There is a strong demand for supervisors of music, drawing, and domestic science.

If you do not have a position this year, and desire to teach next year, come to college as soon as you can and prepare for above subjects. Indiana school officials will have the hardest task of their lives, during the next two or three years, to find instructors to take charge of these new branches. Many country schools, that do not have them this year, will introduce them next year. There will not be enough teachers.

It will pay any person, in case it should be necessary, to borrow money on which to attend college. Any one prepared for the work will be certain to get a good position.

The introduction of vocational courses in the public schools of In-

diana marks the greatest change that has ever been made in the subjects taught. It may well be called a school revolution. Whether the result is to be good or bad, is not now to be discussed. The change will be made, and the wise teachers will prepare for it. Change, although it may not always be progress, is rapid in our day. In all lines the worker must adapt himself to the new conditions.

If you can not be in college during the winter, come at the mid-spring opening. You can prepare for at least a part of the new work during the following eighteen weeks. Supt. Greathouse said in a public address last year: "The Central Normal College has met every requirement of the State Board of Education." It is the intention of the college authorities to maintain this reputation.

Ernest Moser, a student of '95, owns a general store and is postmaster at Guilford, Indiana.

### SPECIAL NOTICE.

Students can enter the Central Normal College Dec. 28, or Jan. 4. Special arrangements will be made to provide suitable classes for all.

### SPRING AND SUMMER WORK FOR 1915.

The Central Normal College will Offer a Wide Range of Work for Teachers. Do not decide where you will attend until you see the next Quarterly. This is to be the Year of Great Progress for the C. N. C.

## COMMENCEMENT OF 1914.

The Commencement of 1914 was one of great satisfaction and pleasure to college officials and faculty. Everything in connection with the exercises of the week was of high merit. The general spirit was one of entire devotion to the welfare of the college.

The festivities began with the Scientific Class-day on Friday. Saturday evening came the final reunion of faculty and students. On Sunday evening Rev. Willis Bond preached the baccalaureate sermon. For this occasion there was special music by chorus club and orchestra. Monday evening the Classics gave their class play. There were no music graduates but on Tuesday evening the department gave a grand concert. The alumni were in charge on Wednesday. At the chapel the Class of '89 held the stage for more than one hour. In the evening Hon. Phillip Zoercher gave the annual address with subject, "The True Soldier." Following this able and eloquent address came the banquet, which extended over into the next morning.

The last occasion was the general commencement on Thursday evening. Judge Thomas Duncan addressed the graduates and an audience that completely filled the auditorium. He discussed the new education in Indiana, showing a wonderfully complete knowledge of the subject. President Laird conferred the degrees and granted diplomas. The stage had been enlarged to accommodate the great number of graduates, there being 97 in the Scientific class. During the year 165 diplomas were granted, the largest number for any year.

Stella Overpeck, '14, is assistant principal of the high school of Tell City, Indiana.

J. H. Heltsley, Sci. '99, made us a visit in September. He came to start a friend in college.

A. T. Wilkes, Classic '99, is cashier of the National Bank of Smithville, Texas. He is prosperous.

Chalmer Schlosser is now a lawyer, with office in the Law Building, Indianapolis. He is a C. N. C. student.

Willis Holiman, Sci. '02, is superintendent at Spencer, Indiana. He has prepared a fine catalogue of the school.

George H. Carter, Sci. '91, is vice-president of the National Bank of Orleans, Indiana. Through him we have a lady student for this year. Her parents have moved to Danville.

A. C. McCraw, Sci. '14, is now in the state university of Mississippi. He will graduate from the law school this year. The institution is at University, Miss. All his C. N. C. credits were accepted.

C. R. Beeler, a student of some years ago, is now living at Warren, Mont. He is a school official and wrote back to C. N. C. for a teacher. He says: "I know that Danville teachers are the best in the world." President Laird sent him B. H. Friend.

A. O. Wolfe, Classic '07, writes an interesting letter. He closes by saying: "Your work tests out all right. You teach the joy of work. Your most valuable lesson to me has been Work and Win, but not work to win."

## TRUSTEES TRANSFER TO COLLEGE.

Many township trustees, who do not maintain a high school transfer their pupils to College instead of to a town high school. A new Indiana law provides for such transfers.

It is desirable to take the high school course in College. The College has better equipment, more competent instructors, and a better library. There is also a more favorable environment for study.

An important advantage in the Central Normal College is that the student can have Commercial or Vocational subjects, as a part of the course. These are not offered in many small high schools, and in none of them will the facilities be so good as in the Central Normal College. A desire to secure work in one or both of the above lines will make a legal excuse for asking the trustee to transfer here.

Expenses are usually much less in a College town, and good rooming places are abundant. In Danville a student secures board and room for about \$3.00 per week, often for \$2.50, while he would pay \$4.00 or more in a town with a good high school.

If you are entitled to a transfer for your high school course, ask your trustee to send you to the Central Normal College. The law allows you to choose your school. The trustee can pay four dollars per month. You would pay the College at the rate of one dollar per month. This one dollar you would save on expenses every week.

The Academic department of the College has been made a commissioned high school by the State Board of Education, but can also grant the certified diploma to those wishing it.

If this does not make the matter clear to you, please write to us.

### REUNION OF CLASS OF 1889.

This class held its quarter-century reunion in Danville, commencement week. We do not have space for an extended notice of the festivities. The entire paper would be needed to do the subject justice.

No previous class has had a more enjoyable reunion. There was not a dull moment. They were entertained by citizens, and also arranged functions of their own. They were prominent in all the festivities of commencement. On Wednesday morning every visitor spoke at chapel. The general opinion was that this is the best speaking class that has held a reunion.

The following members were present: Sol. H. Esary, Indianapolis, H. C. Deist, Columbus, Ind.; Mrs. Anna Lisher Eastes, Greenfield, Ind.; Mrs. Mattie McAdams Zoercher, Indianapolis; J. H. Parker, Greensburg, Ind.; Dr. Carrie Richeson, Bellfountain, O.; Mrs. Mary Reynolds Spees, Greenwood, Ind.; Mrs. Carrie Rein, South Bend, Ind.; Mrs. Lesta Toomire Fripp, Chicago; W. R. Miller, Nome, Alaska.

Alcy Seymoure, Teacher 1910, writes us a long letter from Crawford county, Ind. She had been out visiting some rocky gorges and cliffs, the first she had seen. Her home has always been in Noble county, Ind.
