Because the southwest corner of Section 6 is 12 links north of the southeast corner of Section 1, T.16 N., R. 1 E., the west quarter corner of said Sec. 6 and the two 1/16 section corners were expected to be found offset from the corresponding corners in said Sec. 1. However, extensive digging by me both north and south of said west quarter corner in 1977, together with old fences that were then standing but afterward removed, showed that a single set of stones has been used to mark the corners in both sections, the only exception being at the section corners on the south.
