Read work copy

× Nature, Natural. Things as they appear to us as created by Nature, or Evolution or from natural Causes, not included in the Science of Art.

× Phenomenon, Phenomena, Phenomenal. Things that we see and hear, which appear to us as unnatural, in which we Superstitiously believe to be Supernatural.

× Philosoph, Philosopher, Philosophize. Knowledge of phenomena as explained by Causes, Caused by Natures laws, reasoning from the law of Cause and effect.

× Psychic, Psychology. Pertaining to the Soul or to the living principle in man. Science of the Powers and function of the Soul, life produced by nature that never dies.

Inanimate. Apparently destitute of life, dull, Senseless, Spiritless.

Agnostic. Professing ignorace of, beyond the Wisdom of man.

Miracle, miraculous. Things that appear and are done, that we believe to be Supernatural, that we do not understand the Science of. Produced by the laws of Cause and effect.

× Religion. A system of faith, by which we believe in the Creation of all natural things, the future of man, and by which our destinies are guided.

× Infidel, Infidelity. A disbeliever in a certain fixed Creede or religion. Disobedient to.

George L Leak. 1

Son of James Lawrence and
Harriett Amanda Leak, was born
Feb 9th 1846, on a Farm, Se¼ of Sec 20, Tp 17 North, 1 West
Or what might be a more proper discription,
as my Parents were Pioneers, to say born in the
woods, north West of what is now known
as Ligton, in the Wilds of North Henderson
County. I was one of a Family of Eleven
Children, Seven boys and four girls
The eldest a Sister, born Sept 14th 1840.
And the youngest two Twin Brothers,
born December 27th 1860.
My earliest recollection of my Childhood
days was that our house, yard, Garden,
And Orchard, where many luscious Apples,
And other fine fruit grew. Then there was
the Stables, and Corn Cribs, with a large
Clapboard Shed extending over And between
them. Near by was a Slick, or Cat pond,
where the Stagnant water remained
the year Around. This pond was
infested in the Summer time, with
Tadpoles Frogs, Turtles, Snakes, Lizzards
And Muskitoes. Sometimes in the Spring
and Fall, with Wild ducks. In the
Winter, when it was frozen over,
A Deer or Wild Cat, And smaller
Wild Animals would some times seek
refuge in the brush At this place.
Look Out from our home Across the
Small Clearing Surrounding us,
We looked in Any direction upon
A Solid Forest of growing timber, Some
of as large And fine Trees As ever grew
Any Where in the State, not a building
was in Sight. The Roads or drive ways
were meandering trails cut through
the Woods where it was the most
Convenient to get through from one
home to the next. Blazed trees
marked the paths of the Pedestrians,
And for the Children to find their
way to And from the Schools, which were
taught or kept, in Square log
houses, located At Some supposed
Central point.

In the Surrounding were supposed to be
Elk, Deer, Bear, Wolves, Panther, Wild Cats,
Grey Fox, Coon, Opossum, Mink, Thousands of
Grey Squirrels, And many other small
Animals, Known to the Log Hall As Common
Woods game. Wild Turkeys were plentiful,
And would often Come into the Field,
And were often Shot, And Occasionly
A Deer or Wild Turkey was Shot
by the residents shooting out of their
Own homes. While the writer does
not recollect of ever having saw a
A Wild Elk, Panther, Bear or Wolf,
yet he has found the horns of Elk
in the Woods, that were in a fair
State of preservation (Has one now in
his possession) And knows beyond
Any question of doubt Several Bears being killed,
One was Shot And fatally Wounded,
near Where Geo W Bailey's Residence
now is. But this one escaped into a
Thicket where its Carcass was after-
wards found. Three more were
Killed by David Osborn, near his
residence, And what is now the
Walter Scamman home Farm.
Thousands of Wild ducks, in the early
Spring time, would make light
in the Swamps And Prairie places.
Great quantities of the Beatiful
Wild or Passengers Pigeons
(Which is now extinct) would fly
in great droves, And light
in the Woods, seeking food.
But permit me to say that not until
After the Civil War was the Slaughter
of this beatiful birds Except from the
Simple fact, that the Hunters
not well equiped with good Shotguns.
The last Covey of this beautiful bird that
I have Any recollect of was in the
Woods on my Farm near Ligton in the
early Spring of 1888. The last reliable
report of Any one of these Wild birds
having been seen, was one lone bird
Sitting lit in a Pine tree in H D Leaks
(now where the Porter resides) in March 1894

Began after Mrs. Gibbs
Sure Horse
But without going further into the history

of our part of the County at present, will say that my early Boy hood days was spent about as other Boys of near my age lived in our Neighborhood, by play in the near by Woods, in mild weather, & by digging Ginseng, Gather Wild grapes, Plumbs, And And Various kinds of nuts. As my Grand-Father B, lived less than a mile from us, ours on the Indianapolis and Crawfordsville State Road, which was then the only public road Any was near us, I with two Older Brothers would often go Over there. There, Especialy in the Fall of the year, We Could See many Emigrants in Covered wagons moving West on this Road. And many Travelers on Horseback, that Carried the Old fashioned Saddle Bags. Some of the Covered Wagons were drawn by Oxen. These Travelers would Camp along And near the road for the night. I have A recollection of where one of these Emigrants with his family stopped for the night, Near the Lambert Farm, or what is now the Swain Farm. They had made a fire against a dead tree. During the night And while the family were all a sleep, the fire burned the tree down, And it fell across the wagon tung And killed one the Horses. The tree fell so close to the family that one of them a sleep on the ground that it pulled a bunch of hair from the Wife And Mother. The Man had to find Another Horse to take them on Their journey. He came to my Father, And procured a little old Bay horse That was graizing on the Commons, (or maby in the Road.) He got his Wagon repaired at my Grand Fathers Black Smith Shop, And Continued his trip to Iowa.

Some one may have a Curiosity to know how long this old State Road has been established. To this I will say, that I once heard an old Citizen, - (Able Strickland,) say that he worked on this road, or helped to Construct it in 1829. Since that date, this Road has been Changed some-what in a number of places,

after Iowa
State Road
abandoned
I-2 to Elected Board
Stamper
Sal Lee
a Land school

And as it was a 60 ft established State Road
it has been built in on very much one
Allmost every Farm along the Road.
In an early day there was a Stage Rout
over it, And a Telegraph line along
the Road, which was Abandoned prior
to the Civil War. This telegraph
line was a Single Wire, which was in
in many places fastened to Trees on the
South side of the road.
The parts of this sketch first started to school
to a man by the name of C. L. Stamper
on the 14th day of March 1853. You may
wonder why I am so accurate about the
date of my first entering School, To which
I will say from memory And from
the fact that I found the Contract of this
School Among my Fathers papers, And
which I now have in my possion
This School was taught in a log house
which was located on the East side of the
Road on what is now the Iyen Kennedy
Farm, And opposite the Luther McLean
property. At this time This house had one door which
was in the south side of the building,
A Stick And mud chimney in the East End
One, or maby two, Small Windows (Windows)
big enough in the North side, And a
Narrow Window near the whole
length of the building on the West side
When one log was left out for
the Window. I recollect that one
teacher fared this Window with a
long Slab to keep the pupils from
looking out at this Window towards
the Road. This same teacher permit what
we then called "A Loud School", or Studing
by Spelling and Reading there lessons over
in An Audible voice, in which the noise
Sounded much like the hissing of Geese
And the humming of bees.
The furniture of this house Consisted of
Seets made out Split Slabs with two holes
bored in each end where log Wooden pins
were driven for legs to the seats.
The seets were so high up from the floor
that a small boy or girls feet would reach

Dist 5 School

about half way down to the floor.

There on one side of the house were wood pins driven in the wall, on which were long and wide shelves fastened which were used for writing desks. But then, as well as now, we had some Progressive Citizens, And some of these progressive ones, made one or two long Seats out of Sawed and dressed Poplar lumber, which had backs to them. I went to School in this building at short intervals to C. Z. Stamper, John D Hiatt, William G. Elder And James Burnett, And in the Fall of 1853, John D Hiatt had started in on a 60 or 90 day School, but owing to the prevalence of so much Fever And Ague Among his pupils, he Abandoned his School, And never afterwards was any School taught in this building. This old School building was moved over on the South Side of the State Road by Indians And used for a Wood House.

Some of the teachers that taught in this old building prior to my School days, were such distinguished Citizens as, Elias Leach, Job H Davis, A Mrs. Miligan, James Jackson, And Frank Christmas. The three last were not Citizens of This Vicinity, Consequently dont know where they belonged. But it quite probable that a number of other teachers taught in this old building that are not mentioned in this this last.

Northwest of the No 2 Abandoned Brick School building, a little to the South of the Albert Christer Farm house, was an other Log School building, which was an exact duplicate of the old Log School building at Lizton, except that it was het by a large old-fashioned Box Stove. In the Fall of 1853, I went to School for a short period, to one Elkin Toney. I recall at that my first day at this School I in accompanied by and Older Brother and two Cousins As we never before had been to this building

that we got lost in the woods in

in Trying to find the School house,
And that we finaly found out near a
residence, And that he guided us to the
building, And that it was near noon
when we found the School building,
Although we had been near it
at
